Welcome to Rio

The Latin American Molecular Magnetism community is very happy to host the 16th International Conference on Molecule-based Magnets – ICMM2018. This traditional biennial conference has been held alternately in Europe, Asia and North America since 1989. This is therefore the first time that ICMM is hosted in the Southern hemisphere and we are both pleased and honored to invite you all to present, share and celebrate the new exciting scientific contributions developed by research groups worldwide.

ICMM is currently the main international forum for the discussion of promising and ground-breaking developments in the interdisciplinary area of Molecular Magnetism, integrating chemists, physicists and materials scientists from junior to senior levels. We thus invite contributions from researchers working in all these subjects, and also from related areas, for presentation in the ICMM2018. We believe this meeting has the potential to both increment existing and attract new scientific collaborations, as well as stimulate students and junior researchers to define and pursue their scientific goals in the field.

We welcome all of you to the beautiful city of Rio de Janeiro in Brazil, famous for its exuberant natural landscape, distinctive gastronomy, captivating music and attractive cultural life. In our opinion the first ‘Latin America-hosted’ ICMM holds great promise for everyone accepting this invitation to enjoy excellent science and joyful fellowship in really breathtaking settings.

Looking forward to see you all in Rio,

Miguel Alexandre Novak
Conference Chair

Organized by

UFRJ

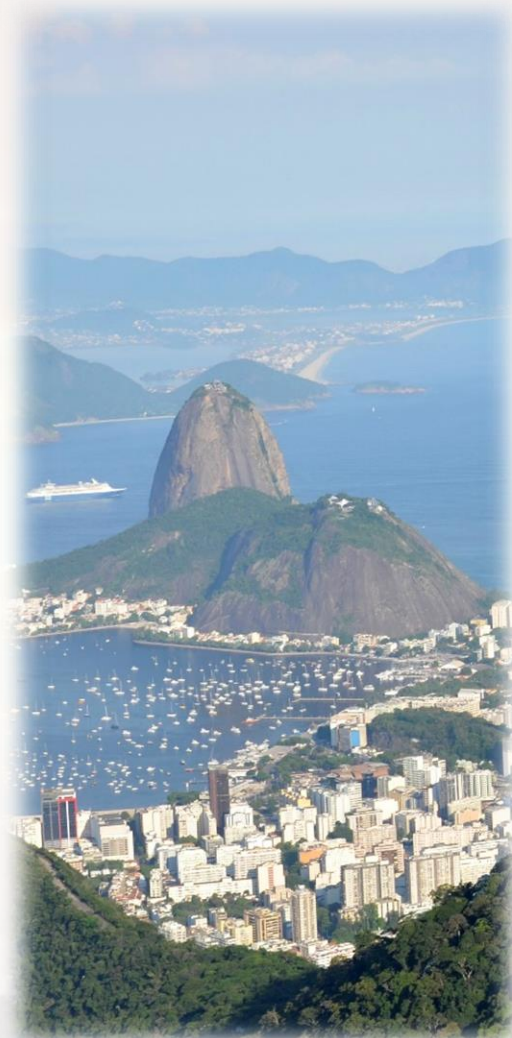

Universidade Federal do Rio de Janeiro
Universidade Federal Fluminense

Supported by

Conference Topics

Molecule-based Magnets
Molecular Nanomagnets
Switchable Magnetic Materials
Multifunctional Magnetic Materials
Magnetic Metal-Organic Frameworks
Molecular Approach to Magnetic Nanostructures
Electronic Structure, Modeling and Theory
Magnetochiral and Frustrated Systems
Spectroscopic and Advanced Experimental Methods
Molecular Spintronics and Interface Magnetic Effects
Spins for Quantum Information
Biomagnetic Phenomena
Magnetic Nanoparticles and Applications
Magneto-Optic and Magnetocaloric Nanomaterials

Important Dates

December 1st, 2017

Online registration and abstract submission opening
