

# Microbial protein targets: towards understanding and intervention

British Society for Parasitology Autumn Symposium in  
collaboration with the Royal Society of Chemistry

Durham University, September 14-16, 2016

## Themes

This symposium will bring together leading expertise in protein structure determination, biochemical characterisation and chemical biology to explore the most recent advances in the understanding of protein function and inhibition of microbial pathogens including bacteria and parasites.

Microbial protein structure determination & analyses  
Biochemical analyses of microbial protein functionality  
Chemical tools for probing microbial protein function  
Drug Discovery for new anti-microbial agents

## Confirmed Speakers

Chris Abell, University of Cambridge  
Michael Barrett, University of Glasgow  
Gurdayal Besra, University of Birmingham  
Simon Croft, London School Hyg. Trop. Med.  
Mike Ferguson, University of Dundee  
Wim Hol, University Washington  
Maria Marco-Martin, GSK Tres Cantos  
Gerald Spaeth, Institut Pasteur  
Ed Tate, Imperial College London  
Rita Tewari, University of Nottingham

## Registration and abstract submission
