

# Rutherford's Chemists

Glasgow, 15th/16th July, 2017

Marie Curie: 1867 - 1934  
Radium 1898

Frederick Soddy: 1877 - 1956  
Transmutation 1902  
Isotopes 1913

Bertram Boltwood: 1870 - 1927  
Radiometric dating 1907

A two-day meeting, co-sponsored by the Institute of Physics and Royal Society of Chemistry, to celebrate the centenary of the second scientific revolution and a unique collaboration between physics and chemistry.

The meeting will feature invited lecturers who will speak on the contributions of key radio-chemists, including Marie Curie, Frederick Soddy, William Ramsay and Georg von Hevesy, who collaborated with Lord Rutherford after the discovery of radioactivity resulting in the birth of modern physical science.

**Venue:** Kelvin Building, University of Glasgow

**Date and time:** 2.00 pm on Saturday 15th July, with registration from 12.30 pm.
