

# Brazil-UK Industry Day

## Chemical and Biotechnological Biorenewables Opportunities

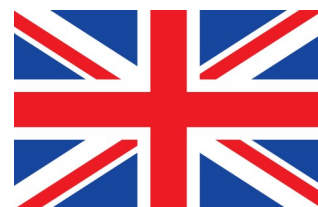

**Thursday, 3<sup>rd</sup> September 2015, 10am—5.30pm**

Green Chemistry Centre of Excellence (GCCE), Department of Chemistry, University of York

**Join us for this unique event to discuss  
Brazil-UK Biorenewables opportunities with  
senior Brazilian and UK researchers, major  
companies and other stakeholders.**

Brazil now has the sixth largest chemical industry worldwide, the third largest cosmetics market, is a major life sciences and healthcare hub that grew by 35% in 3 years, and has a huge renewable and biodiverse resource base. York is a world leader in bio-based chemistry and biotechnology research and the combination of Brazil-UK green chemistry and biotechnology scientific expertise, resources and industrial investment offers enormous opportunities for novel solutions and new markets within the green economy.

This event will highlight:

- The Brazilian chemical and policy landscape
- Results and lessons learnt from successful UK-Brazil research and industrial collaborations
- Key opportunities for UK companies and research within the bio-based economy sector

**Register for your free place by Monday 31<sup>st</sup> August 2015 at**
