Tarragona, founded by the romans in the 3rd century BC as Tarraco, is a welcoming seaside city located on the south of Catalonia, just 100km south of Barcelona. Tarragona is essentially a city open to the sea, bathed in the light and the mild climate of the Mediterranean, with a renowned and cultural Roman heritage, which was declared Word Heritage Site by UNESCO.

Tarragona brings together modernity and tradition. With 14 km of sandy beaches and calm waters, it has a wide offer of restaurants. The city also has an important seaport and the most important petrochemical complex in southern Europe. Moreover, Tarragona has kept its traditions alive, such as its fantastic castells (human towers), declared Intangible Heritage by UNESCO.

The *Universitat Rovira i Virgili* (URV) and the *Institut Català d'investigació Química* (ICIQ) are delighted to announce the 13th Spanish-Italian Symposium on Organic Chemistry (SISOC-XIII) to be held in Tarragona on September 4-6, 2022.

The symposium belongs to a cycle of bilateral Spanish-Italian meetings organized biannually by the Organic Chemistry Division of the Real Sociedad Española de Química and the Società Chimica Italiana. The event aims at encouraging the exchange of experiences and information between the most important experts of the two countries in this field, in order to establish networks and collaborations and improve the development of research in organic chemistry.

The program includes:

- 12 Keynote lectures (25+ 5min)
- 16 Invited lectures (15 + 5 min)
- Oral communications (10 + 5 min)
- Flash communications (5 min)
- Posters
