The Handbook of Continuous Crystallization
Nima Yazdanpanah Massachusetts Institute of Technology, USA
Zoltan K Nagy University of Purdue, USA

Improvements in continuous crystallization technologies offer chemical industries significant financial gains, through reduced expenditure and operational costs. This book is first authoritative guide to the field, covering fundamental and applied knowledge, process intensification, scaling up, best practice and regulatory considerations. With contributions from leading academics and researchers in industry, this definitive guide is ideal for those working in crystallization, particulate matters, pharmaceutical engineering, processing engineering, and advanced manufacturing.

Hardback | 602 pages | ISBN 9781788012140 | £125.00 | $175.00 | 14/02/2020

Anti-fibrotic Drug Discovery
Jehrod Brenneman KSQ Therapeutics, USA
Malliga R Iyer National Institutes of Health, MD, USA

Fibrosis is a condition with globally high unmet medical need, and as such is a highly active area of academic and pharmaceutical research covering multiple treatment targets, organs, tissues and therapeutic approaches. Anti-fibrotic Drug Discovery is a single source reference for the latest drug-discovery approaches to tackle fibrosis in various tissues, comprehensively covering recent success and future perspectives on emerging therapeutic intervention points. This book is ideal for practitioners in fibrosis drug discovery and research as well as clinicians specialising in liver, kidney, heart and lung disease, in which fibrosis plays a key role in pathology.

Hardback | 340 pages | ISBN 9781788015103 | £169.00 | $235.00 | 28/02/2020

Catalysis
Volume 32
James Spivey Louisiana State University, USA
Yi-Fan Han East China University of Science and Technology, China
Dushyant Shekhawat National Energy Technology Laboratory, USA

Catalysts are required for a variety of applications and researchers are increasingly challenged to find cost effective and environmentally benign catalysts to use. This volume looks at modern approaches to catalysis and reviews the extensive literature including metal-support interactions of Ru-based catalysts under conditions of CO and CO2 hydrogenation, electrocatalytic applications of heteroatom-doped carbon nanostructures and catalytic decomposition of gas-phase benzene.

Hardback | 223 pages | ISBN 9781788017749 | £314.95 | $440.00 | 05/02/2020
