

2017 Prizes and Awards Statistics

The Royal Society of Chemistry is committed to supporting and improving diversity and inclusion in the chemical sciences. As part of this commitment we are publishing statistics relating to gender diversity in our Prizes and Awards Programme. We plan to update this data with each annual announcement of our prize and award winners.

Please note the following points regarding the above statistics:

- These statistics relate to the Royal Society of Chemistry's central Prizes and Awards Programme and its 2017 winners.
- All percentages have been rounded to integers
