Environment, Sustainability and Energy Division

Environment, Sustainability and Energy Division Strategy

The Environment, Sustainability and Energy Division is an inter-connected community advancing knowledge and application of chemistry relating to the environment, sustainability and energy.

ESED's strategy focusses on three strategic priorities:

1. **Linking People:** To foster and strengthen links between those working in the fields of environment, sustainability and energy.
2. **Advancing Knowledge:** To further the exchange of knowledge in the areas of environment, sustainability and energy, for example through the development of events, workshops and symposia.
3. **Policy:** To inform and influence policy in the areas of environment, sustainability and energy.
