
LIABILITY OF WATER CHEMISTS

BY

TREVOR ADAMS

**(Lecturer at the College of Law, Chester, and formerly
Senior Associate in the Environmental Law Group of Allen & Overy, Solicitors)**

*The Society and the Author wish to acknowledge the
support of Allen & Overy, Solicitors, in the
preparation and production of this publication*

ALLEN & OVERY

The Royal Society of Chemistry acknowledges the support of Allen & Overy in the preparation and production of this work. The booklet was written by Trevor Adams whilst a member of Allen & Overy's Environmental Law Group and was subsequently copy edited and desk top published by the firm. However, responsibility for the booklet's contents remains that of the author.

Allen & Overy is a leading global law firm with headquarters in London. Founded in 1930, it has over 200 partners and some 2,300 staff working in 20 major centres on three continents. It is a "full service" law firm which provides international and domestic clients with a comprehensive service covering all aspects of commercial law.

The London Environmental Law Group of Allen & Overy comprises a team of sixteen lawyers and is headed by corporate partner, Owen Lomas. It is based in the corporate department, a reflection of the broad commercial view taken of environmental issues. The Group offers specialist advice to corporate, banking and finance clients and governments on a wide range of regulatory compliance and liability issues in relation to matters such as waste management, air and water pollution, health and safety and land contamination under UK and EU law.

The Group has substantial experience of advising major UK and US industrial clients on developing corporate environmental policies and environmental management and audit systems. Other particular areas of strength include Producer Responsibility for recycling waste and other products, infrastructure projects (power, roads, PFI, etc.), environmental insurance and environmental litigation. It is also heavily involved with transactional matters in relation to mergers and acquisitions, MBOs, financings and stock exchange transactions, both at the due diligence stage and in drafting complex contractual provisions for apportioning liability.

If you would like further information about Allen & Overy or the Environmental Law Group please contact Owen Lomas on 0171 330 3000 or by e-mail, owen.lomas@allenoverly.com.
