

**THE ROYAL SOCIETY OF CHEMISTRY ("the RSC")
OPEN ACCESS LICENCE TO PUBLISH CC BY-NC**

If the journal in which the Work is to be published is published by the RSC on behalf of another organisation/other organisations the rights granted to the RSC in Clause 1 shall also be granted to the other organisation(s).

The Work consists of the paper or other contribution, including but not limited to, the text of the paper, figures, illustrations, diagrams and tables ("the Paper") and the accompanying supplementary material, that is, material that relates to the Paper that will not be made available as part of the Paper, but that will be made available electronically only ("the Supplementary Material").

1. Rights Granted

(a) In consideration of the RSC evaluating the Work for publication by the RSC (and publishing the Work if it so decides) the Owner grants to the RSC the exclusive right and licence throughout the world to edit, adapt, translate, reproduce and publish the Paper and a non-exclusive right and licence throughout the world to edit, adapt, translate, reproduce and publish the Supplementary Material in all formats, in all media and by all means (whether now existing or in future devised). Such licences are for the full term of copyright in the Work throughout the world (including all renewals, extensions and reversions). Such licences are freely transferable by the RSC and include the right to sub-licence. The RSC may sell or distribute the Work, the Paper, and/or the Supplementary Material within a journal, on its own, or with other related material.

(b) The rights to any raw research data included in the Work are not covered by this Licence.

2. Warranties

The Owner warrants, on behalf of all the Author(s), that:

(a) The Owner is authorized by all Author(s) to enter into these arrangements.

(b) the Work is the original work of the Author(s) and not copied (in whole or in part) from any other work or matter or (if the Work includes copyright works of persons other than the Author(s)) the Work is substantially the original work of the Author(s) and all necessary permissions have been obtained for use of such copyright works of such other persons.

(c) the Work has not been and will not prior to publication by the RSC be published, with the exception of presentation of the research in the manner listed below. Upon submission of the Work to the RSC the Author(s) must disclose any prior deposition in any repository(ies). The research may be presented ahead of publication in the following manner:

(i) through the deposition of a preprint version of the paper in non-commercial repositories (e.g. ArXiv), institutional repositories or authors' individual websites, where a preprint is defined here as an un-refereed author version of the paper; and a non-commercial repository is defined here as any platform or archiving service which makes digital content free to deposit and access;

(ii) at scientific conferences. This includes recorded presentations, poster presentations and abstracts that are made openly available online;

(iii) in commercial or non-commercial databases (data without interpretation, discussion, conclusions or context with a wider experimental project);

(iv) in an open electronic lab notebook;

(v) in blogs, wikis, tweets, and other informal communication channels;

(vi) as a thesis or dissertation published as part of an academic or professional qualification, in print and online; and/or

(vii) in any digital medium which is operated by the RSC, excluding journals, books and magazines.

(d) the exercise of the rights granted to the RSC by this Licence will not infringe the copyright of any person or result in any breach of confidentiality or the breach of any contract or of any law.

(e) The Owner, or his/her funding organisation, will pay the requisite fee for publication of the Work under the terms set out in Clause 4 below.

3. Other Rights

Notwithstanding anything to the contrary contained in this Licence:

(a) This Licence shall take effect as a non-exclusive licence in respect of any parts of the Work as were written by an Author(s) in the course of employment by the Australian, British and Canadian Governments and copyright of such parts of the Work shall be reserved to the Crown.

(b) This Licence shall take effect only to the extent permitted by the laws of the United States of America if and to the extent that the Work or any part of the Work was written by an Author(s) in the course of employment by the United States Government.

4. Publication and Acknowledgement

The RSC shall publish the final version of the Paper on its website without any barriers to access under the terms of a Creative Commons Attribution-NonCommercial 3.0 Unported licence (CC BY-NC 3.0).

(a) This licence lets others remix, tweak, and build upon the Work non-commercially, and although the new works must also acknowledge the Owner and be non-commercial, the new derivative work does not have to be licensed on the same terms as the original.

(b) The Author(s) and others must attribute the first publication of the Work by the RSC (the forms of acknowledgement can be found in the author guidelines on the RSC's website).

5. Permissions for Commercial Use

(a) The Author(s) may, without seeking permission from the RSC reproduce/republish portions of the Paper (including the abstract) in other commercial publications as long as it is fully attributed.

(b) The Author(s) must submit a written request to the RSC for republication of the whole Paper in other commercial publications. This will be treated on a case-by-case basis.

6. Non-publication

If the RSC notifies the Author(s) that it will not be publishing the Work or if the Author(s) chooses to withdraw the Work prior to publication then all licences granted to the RSC as set out in this Licence cease.

7. Applicable Law

This Licence shall be governed in all respects by English law. This Licence embodies and sets forth the understanding of the parties and supersedes all prior understandings and written agreements relating to the subject matter of this Licence.
