Scheme S1 Structure of HSB and ACTD.

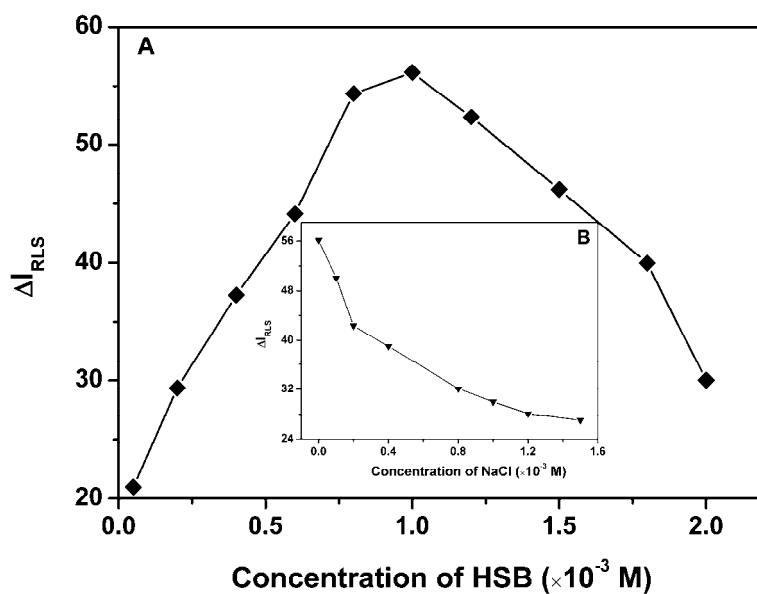

Fig. S1 (A) Influence of HSB concentration to the analytical system. Conditions: pH=7.4; dsDNA, $2.0 \mu\text{g mL}^{-1}$; ACTD, $2.0 \mu\text{g mL}^{-1}$. (B) Influence of ionic strength to the analytical system.

Conditions: pH=7.4; dsDNA, $2.0 \mu\text{g mL}^{-1}$; ACTD, $2.0 \mu\text{g mL}^{-1}$.
