

Supporting Information

Table S1 Effect of temperature on the color scale and the RGB values obtained on the paper strip from colorimetric determination of cyanide after converting the free cyanide into the vapor form.

Temperature (°C)	10 cyanide $\mu\text{g l}^{-1}$	50 cyanide $\mu\text{g l}^{-1}$
10	 (245, 230, 255)	 (180, 160, 190)
27	 (245, 230, 255)	 (180, 160, 190)
39	 (230, 210, 245)	 (170, 150, 185)

The values in the parentheses are the RGB values.
