

Supplemental Figure 1

Effect of various MENDs on LPS-induced secretion of TNF- α and IL-6 from dendritic cells
Various MENDs decreased the levels of TNF- α (a) and IL-6 (b) secreted from BMDCs treated with LPS. Reproducibility of the results was confirmed by repeating the same experiment. □:D-MEND, ■:R8-D-MEND, ○:P-MEND, ●:R8-P-MEND
