## Conducting films based on single-component molecular metals

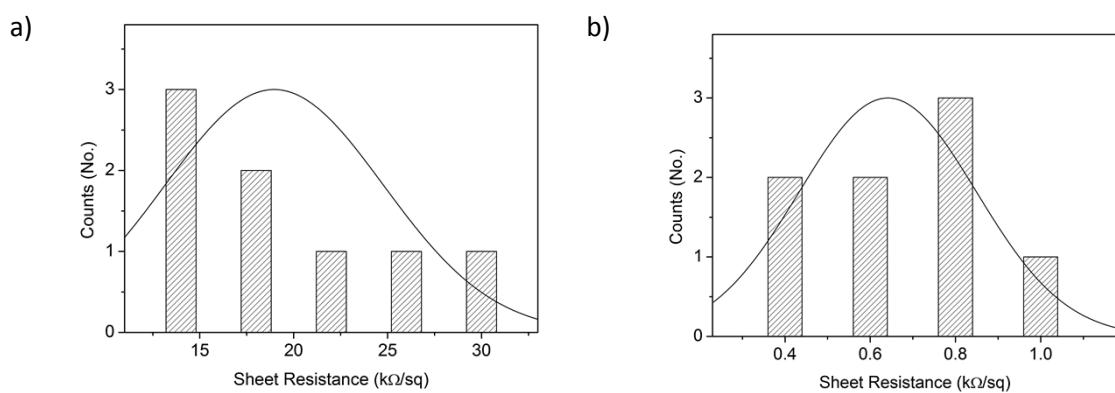

**Fig. S1** *I*-*V* curves for unbaked and baked  $[\text{Au}(\alpha\text{-tpdt})_2]$  films prepared from different solvents.

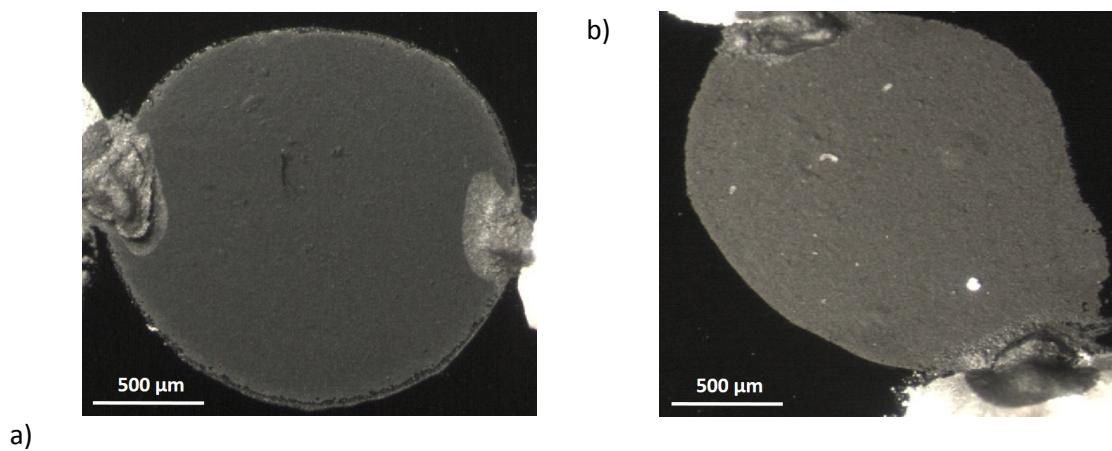

**Fig. S2** SEM images of  $[\text{Au}(\alpha\text{-tpdt})_2]$  films prepared with: (a) acetonitrile, and (b) dichlorobenzene.

**Fig. S3** Effect of baking on  $[\text{Au}(\alpha\text{-tpdt})_2]$  films prepared from different solvents: (a) acetonitrile, (b) toluene, and (c) dichloromethane.

**Fig. S4** Histogram of sheet resistance values of: (a)  $[\text{Au}(\alpha\text{-tpdt})_2]$ , and (b)  $[\text{Ni}(\text{dtddt})_2]$ .

**Fig. S5** Optical images of: (a)  $[\text{Au}(\alpha\text{-tpdt})_2]$ , and (b)  $[\text{Ni}(\text{dtddt})_2]$ .
