## Supporting Information

# Economic Analysis of CNT Lithium-Ion Battery Manufacturing 

A. Hakimian, S. Kamarthi, S. Erbis, K.M. Abraham, T.P. Cullinane, J.A. Isaacs

| 1- Cathode \& Anode Mixing |  |  |  |
| :---: | :---: | :---: | :---: |
| Cathode Material Input (in mixer) |  |  |  |
|  | \% of cathode active material | 55 | \% |
|  | \% of NMP | 40 | \% |
|  | \% of PVDF | 2 | \% |
|  | \% of MWCNT | 1 | \% |
|  | \% of carbon black | 2 | \% |
| Cathode Material Input / cell |  |  |  |
|  | Cathode active material (NMC) | 0.307 | kg |
|  | PVDF | 0.034 | kg |
|  | MWCNT | 0.016 | kg |
|  | Carbon black | 0.018 | kg |
|  | Total cathode weight | 0.375 | kg |
|  | NMP | 0.106 | kg |
|  | Sodium hydroxide | 0.005 | kg |
|  | Sulphuric acid | 0.003 | kg |
|  | Cost of cathode active material | 15 | \$/kg |
|  | Cost of NMP | 4 | \$/kg |
|  | Cost of PVDF | 20 | \$/kg |
|  | Cost of MWCNT | Stochastic | \$/kg |
|  | Cost of carbon black | 10 | \$/kg |
|  | Cost of sodium hydroxide | 0.30 | \$/kg |
|  | Cost of sulphuric acid | 0.48 | \$/kg |
| Anode Material Input (in mixer) |  |  |  |
|  | \% of anode active material | 45 | \% |
|  | \% of NMP | 10 | \% |
|  | \% of Carbon black | 5 | \% |
|  | \% Deionized water | 40 | \% |
| Anode Material Input / cell |  |  |  |
|  | Anode active material(Graphite+latex) | 0.024 | kg |
|  | Carbon black | 0.017 | kg |
|  | Total anode weight | 0.250 | kg |
|  | NMP | 0.078 | kg |
|  | Deionized water | 0.105 | kg |
|  | Sodium hydroxide | 0.009 | kg |
|  | Sulphuric acid | 0.006 | kg |
|  | Cost of anode active material | 20 | \$/kg |

|  | Cost of NMP | 4 | $\$ / \mathrm{kg}$ |
| :--- | :--- | :--- | :--- |
|  | Cost of PVDF | 20 | $\$ / \mathrm{kg}$ |
|  | Cost of deionized water | 3.785 | $\$ / \mathrm{kg}$ |
|  | Cost of sodium hydroxide | 0.30 | $\$ / \mathrm{kg}$ |
| Labor | Cost of sulphuric acid | 0.48 | $\$ / \mathrm{kg}$ |
|  |  |  |  |
| Equipment | Number of labor | 3 | worker/line |
|  |  | 7,800 | $\$$ |
|  | Cost of primary equipment (mixer) | 15 | kw |
|  | Power rating of mixer | 0.0047 | hrs |
| Facility | Lifespan of mixer | 80 |  |
|  | Process time per cell | $\mathrm{sq} . \mathrm{ft}$ |  |

| 2-Cathode \& Anode Coating + Baking |  |  |  |
| :--- | :--- | :--- | :--- |
| Cathode Material Input / cell |  | 0.017 | kg |
|  | Aluminum sheet | 10 | $\$ / \mathrm{kg}$ |
|  | Cost of aluminum |  |  |
|  |  | 0.051 | kg |
| Anode Material Input / cell | Copper sheet | 15 | $\$ / \mathrm{kg}$ |
|  | Cost of copper |  |  |
|  |  | 3 | worker/line |
| Labor | Number of labor |  |  |
|  |  | 20,000 | $\$$ |
| Equipment | Cost of primary equipment (coater) | 120 | kw |
|  | Power rating of machine | 8 | yrs |
|  | Lifespan of machine | 0.0002 | $\mathrm{hrs} / \mathrm{cell}$ |
|  | Process time per cell |  |  |
|  |  | 250 | $\mathrm{sq} . \mathrm{ft}$ |
| Facility | Floor space used |  |  |
|  |  |  |  |

| $\mathbf{3}$ - Calendaring (Pressing) |  |  |  |
| :--- | :--- | :--- | :--- |
| Material Input / cell |  |  |  |
|  |  |  |  |
| Labor | Number of labor | 3 | Worker/line |
|  |  |  |  |
| Equipment | Cost of primary equipment | 20,000 | $\$$ |
|  | Power rating of machine | 20 | kw |
|  | Lifespan of machine | 8 | yrs |
|  | Process time per cell | 0.0002 | hrs/cell |
|  |  |  |  |
| Facility | Floor space used | 250 | sq. ft |

| 4 - Cutting |  |  |  |
| :--- | :--- | :--- | :--- |
| Material Input / cell | Separator (Aluminum) | 0.034 | kg |
|  | Cost of separator | 10 | $\$ / \mathrm{kg}$ |
|  |  |  |  |
| Labor | Number of labor | 3 | Worker/line |
|  |  |  |  |
| Equipment | Cost of primary equipment | 40,000 | $\$$ |
|  | Power rating of machine | 25 | kw |
|  | Lifespan of machine | 10 | yrs |
|  | Process time per cell | 0.00003 | $\mathrm{hrs} / \mathrm{cell}$ |
|  |  |  |  |
| Facility |  | 300 | sq. ft |
|  |  |  |  |

| - Assembling (stacking \& winding) |  |  |  |
| :--- | :--- | :--- | :--- |
| Material Input / cell |  |  |  |
|  | Can / Case (aluminum) | 0.017 | kg |
|  | Cost of case | 10 | $\$ / \mathrm{kg}$ |
|  |  |  |  |
| Labor |  |  |  |
|  | Number of labor | 3 | Worker/line |
| Equipment |  | 20,000 | $\$$ |
|  | Cost of primary equipment | 25 | kw |
|  | Power rating of machine | 10 | yrs |
|  | Lifespan of machine | 0.003 | $\mathrm{hrs} / \mathrm{cell}$ |
|  | Process time per cell |  |  |
| Facility |  | 300 | $\mathrm{sq} . \mathrm{ft}$ |
|  |  |  |  |

| 6 - Wetting or Filling |  |  |  |
| :---: | :---: | :---: | :---: |
| Material Input / cell |  |  |  |
|  | Electrolyte | 0.17 | kg |
|  | Cost of electrolyte | 20 | \$/kg |
| Labor |  |  |  |
|  | Number of labor | 3 | Worker/line |
| Equipment |  |  |  |
|  | Cost of primary equipment | 10,000 | \$ |
|  | Power rating of machine | 25.0 | kw |
|  | Lifespan of machine | 10 | yrs |
|  | Process time per cell | 0.0003 | hrs/cell |
| Facility |  |  |  |
|  | Floor space used | 300 | sq. ft |

| 7 - Sealing \& Welding |  |  |  |
| :--- | :--- | :--- | :--- |
| Material Input / cell |  |  |  |
|  |  | 3 | Worker/line |
| Labor | Number of labor |  |  |
|  |  | 30,000 | $\$$ |
| Equipment | Cost of primary equipment | 30 | kw |
|  | Power rating of machine | 10 | yrs |
|  | Lifespan of machine | 0.0003 | Hrs/cell |
|  | Process time per cell |  |  |
|  |  | 300 | sq. ft |
|  | Facility | Floor space used |  |

| 8 - Forming \& Grading\& Testing |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: |
| Material Input / cell |  |  |  |  |
|  |  |  |  |  |
| Labor | Number of labor | 0.609 | Worker/line |  |
|  |  |  |  |  |
| Equipment | Cost of primary equipment | 12,000 | \$/line |  |
|  | Power rating of machine | 6 | kw |  |
|  | Lifespan of machine | 10 | yrs |  |
|  | Process time (per 512 Cells) | Stochastic | hrs |  |
|  |  |  |  |  |
| Facility | Floor space used | 250 | sq. ft |  |
|  |  |  |  |  |

| 9 - Final Assembly |  |  |  |
| :---: | :---: | :---: | :---: |
| Material Input / battery |  |  |  |
| Module container |  |  |  |
|  | Aluminum /per module | 3.43 | kg |
| Battery pack container |  |  |  |
|  | Steel | 28.756 | kg |
|  | Copper wiring | 2.157 | kg |
|  | Steel | 2.157 | kg |
|  | Printed circuit board |  | kg |
| Passive cooling system |  |  |  |
|  | Aluminum | 28.756 | kg |
|  | Cost of steel | 1 | \$/kg |
|  | Cost of aluminum | 10 | \$/kg |
|  | Cost of copper wiring | 15 | \$/kg |
|  | Cost of printed circuit board (cell connecting) |  | \$/cell |
| Labor |  |  |  |
|  | Number of labor | 3 | worker |
| Equipment |  |  |  |
|  | Cost of primary equipment | 25,000 | \$ |
|  | Power rating of machine | 15 | kw |
|  | Lifespan of machine | 10 | yrs |
|  | Process time per battery | 0.1 | hrs/battery |
| Facility |  |  |  |
|  | Floor space used | 500 | sq. ft |

| Safety Parameters |  |  |  |
| :---: | :---: | :---: | :---: |
| Ventilation |  |  |  |
| General exhaust ventilation (GEV) |  |  |  |
|  | Air changes/hr (nanomanufacturing) | 25 | AC/hr |
|  | Total floor space needed | 3,839 | sq. ft |
|  | Soace height | 20 | sq. ft |
|  | Space volume ( $\mathrm{w}^{*} \mathrm{ht}{ }^{*} \mathrm{t}$ ) | 76,785 | cu.ft |
|  | Ventilation rate | 31,994 | cfm |
|  | Capital cost | 25 | \$/cfm |
|  | Operating cost | 7 | \$/cfm/yr |
|  | Lifespaan | 10 | yrs |
| Local exhaust ventilation (LEV) |  |  |  |
|  | Total number of lines needed LEV | 9 | lines |
|  | Fume hoods | 18,000 | \$ |
|  | HEPA filter cost | 299 | \$ |
|  | Number of filters needed for each LEV | 4 | filters |
|  | Maintenance cost | 5\% | \% |
|  | Extra labor cost | 25\% | \% |
|  | Fumehood power rating | 10 | kw |
|  | Fume hood life span | 10 | yrs |
| Enclosure of processes |  |  |  |
|  | Cost of enclosure - extra equipment cost | 50\% | \% |
|  | Maintenance cost | 20\% | \% |
|  | Cost of enclosure - extra labor cost | 50\% | \% |
| Insurance |  |  |  |
|  | Cost of insurance | 1\% | \% |
| Personal protection equipment |  |  |  |
|  | Total number of workers | 21 | pairs |
|  | 1- Latex gloves |  |  |
|  | Cost of pair of Latex gloves | 0.13 | \$/pair |
|  | 2- Nitrile gloves |  |  |
|  | Cost of pair of Nitrile gloves | 0.19 | \$/pair |
|  | 3- Disposable respirators |  |  |
|  | Cost of Disposable respirators | 1.1 | \$/mask |
|  | 4-Respirators with HEPA filters |  |  |
|  | Cost of HEPA mask | 29 | \$/mask |
|  | Cost of HEPA filters | 10 | \$/pair |
|  | Usage period for HEPA filters | 30 | hrs |

|  | 5- Tyvek suits |  |  |
| :--- | :--- | :--- | :--- |
|  | Cost of Tyvek suits | 6 | \$/suit |
|  | 6- Hazardous waste of PPE |  |  |
|  | Weight of pair of Nitrile gloves | 0.05 | lb |
|  | Weight of HEPA filters | 1.25 | lb |
|  | Weight of Tyvek suit | 0.50 | lb |
|  | Cost of disposal of hazardous waste of <br> PPE | Stochastic | \$/lb |
| Administrative Control |  |  |  |
|  | Cost of Air Monitoring Equipment | 20,000 | $\$$ |
|  | Power rating of machine | 30 | kw |
|  | Operating cost for air monitoring | $20 \%$ | $\%$ |
|  | Cost of medical monitoring | 950 | $\$ / \mathrm{person} / \mathrm{yr}$ |
|  | Lifespan of machine | 10 | yrs |
|  | Frequency of Air Monitoring |  |  |
|  | Low case | 12 | $\mathrm{days} / \mathrm{yr}$ |
|  | Medium case | 52 | $\mathrm{days} / \mathrm{yr}$ |
|  | High case | 104 | $\mathrm{days} / \mathrm{yr}$ |
