

## Supplementary Figure 1

Klein *et al.*

Demonstration of the dynamic mass redistribution label-free technology as a useful cell-based pharmacological assay for endogenously expressed GABA<sub>A</sub> receptors

DMR kinetic traces after application of the GABA antagonists gabazine (A), bicuculline (B) and CGP36742 (C) as a function of time (concentrations given as  $\mu\text{M}$ ). Neither of the ligands gave any response.
