Table of contents:

Title of contents.....	1-2
Fig. S1 (a) Nitrogen adsorption–desorption isotherms and (b) Barrett–Joyner–Halenda (BJH) pore diameters of SBA-15, ASBA , and TSBA	3
Fig. S2 Fluorescence intensity increment ($F-F_0$) of ASBA (88.0 mg mL^{-1}) and TSBA (72.0 mg mL^{-1}) recorded at 526 nm at different times upon adding $1.000 \text{ }\mu\text{M}$ of F^- in pH 7.4 HEPES buffered water ($\lambda_{\text{ex}} = 496 \text{ nm}$).....	4-6
Fig. S3 (a) Fluorescence intensity increment ($F-F_0$) of TSBA (88.0 mg mL^{-1}) at 526 nm at different concentrations of F^- ($0.0\text{-}1500 \text{ }\mu\text{M}$) in pH 7.4 HEPES buffered water ($\lambda_{\text{ex}} = 496 \text{ nm}$). Insert: enlarged figure in the concentration range of $0.2\text{-}0.75 \text{ }\mu\text{M}$ of fluoride anion and (b) Fluorescence intensity increment ($F-F_0$) of ASBA (72.0 mg mL^{-1}) at 526 nm at different concentrations of F^- ($0.0\text{-}1500 \text{ }\mu\text{M}$) in pH 7.4 HEPES buffered water ($\lambda_{\text{ex}} = 496 \text{ nm}$). Insert: enlarged Figure in the concentration range of $10.0\text{-}90.0 \text{ }\mu\text{M}$ of fluoride anion.....	7
Fig. S4 IR spectra of spent TSBA and TM-FITC	8
Fig. S5 Absorption spectra of TSBA (88.0 mg mL^{-1}) in 7.4 pH HEPES buffered water upon addition the same concentration of F^- , HPO_4^{2-} , AcO^- , Cl^- , Br^- , I^- , and NO_3^- ..	9

Fig. S6 Fluorescence spectra of **TM** and **TM-FITC** in the absence and presence of 1000 μM solutions of F^- , HPO_4^{2-} , AcO^- , Cl^- , Br^- , I^- , and NO_3^- 10
