Ultratrace Level Determination and Quantitative Analysis of Kidney Injury Biomarkers in Patient Samples Attained by Zinc Oxide Nanorods

*Manpreet Singh[†], Anginelle Alabanza[†], Lorelis E. Gonzalez[†], Weiwei Wang[‡], W. Brian Reeves[‡],
and Jong-in Hahn^{†,*}*

Figure S1. Representative SEM images of the typical ZnO NRs used in the biomarker assays.

The panels are (left) 5 μm x 5 μm and (right) 2 μm x 2 μm in size.
