**Figure S1.** Schematic illustration of proposed polymer–ion interactions between PTMC-OH and LiTFSI. Note that the  $\text{Li}^+$  coordination number has been arbitrarily set to 4 and that the polymer structure has been greatly simplified, showing only selected functional groups that participate in ion coordination.

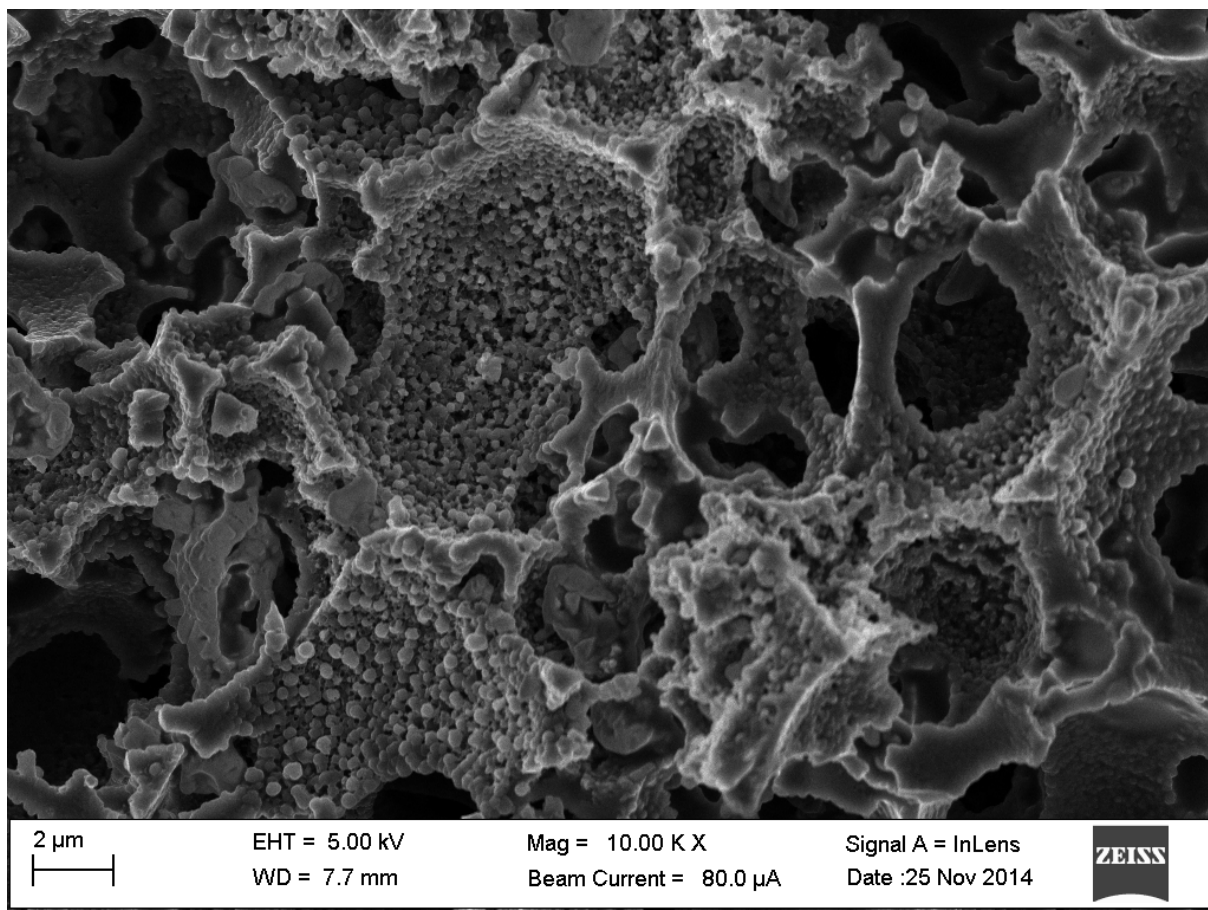

Figure S2. Pristine  $\text{LiFePO}_4$ -coated ultraporous carbon foam.

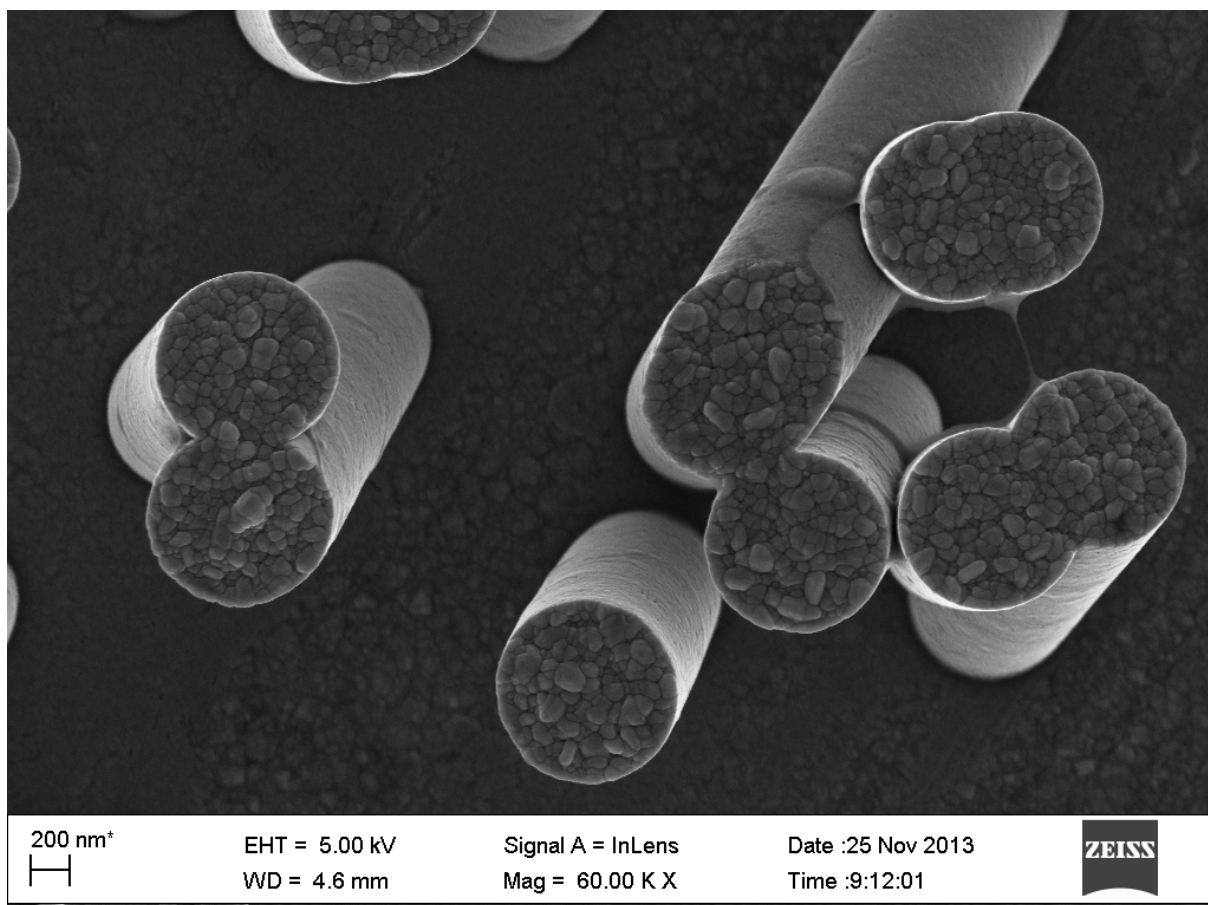

Figure S3. Pristine  $\text{Cu}_2\text{O}$ -coated Cu nanopillars
