

## Organotin carboxylate catalyst in urethane formation in polar solvent: An experimental and computational study

Ransi Devendra,<sup>a</sup> Neil R. Edmonds<sup>a</sup> and Tilo Söhnel<sup>a,b,\*</sup>

Supplementary Information

**Scheme 1S.** Mechanisms for the catalysis in urethane formation with organotin compounds used as catalysts

**Figure 1S.** IRC for the transition states TS1, TS2 and TS3 for the interaction between DMTDA, methanol and methyl isocyanate.

**Figure S2.** IRC for TS1 and TS2 for the interaction between DMTMA, methanol and methyl isocyanate (O-coordinated interaction).

**Figure S3.** IRC TS1 for TS2 for the interaction between DMTMA, methanol and methyl isocyanate (N-coordinated interaction).

**Tables S1 a)-f).** Coordinates of the structures shown in Figure 10.

**Tables S2 a)-b).** Coordinates of the structures shown in Figure 11.

**Tables S3 a)-d).** Coordinates of the structures shown in Figure 14.

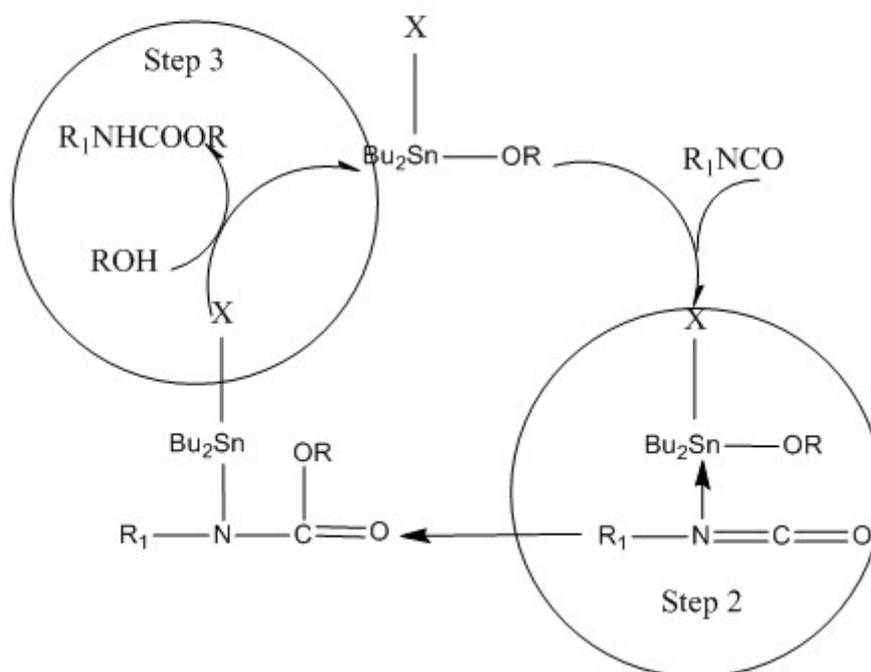

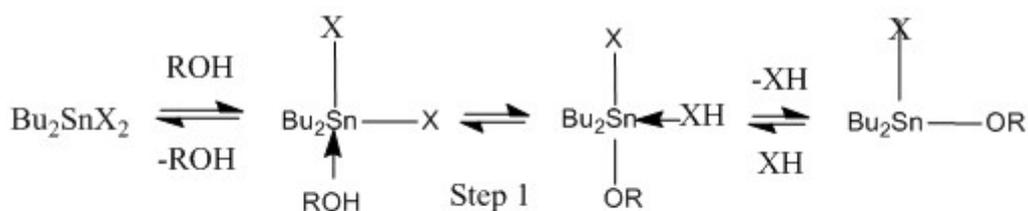

**Tables S4 a)-d).** Coordinates of the structures shown in Figure 15.

**Scheme 1S.** Mechanisms for the catalysis in urethane formation with organotin compounds used as catalysts

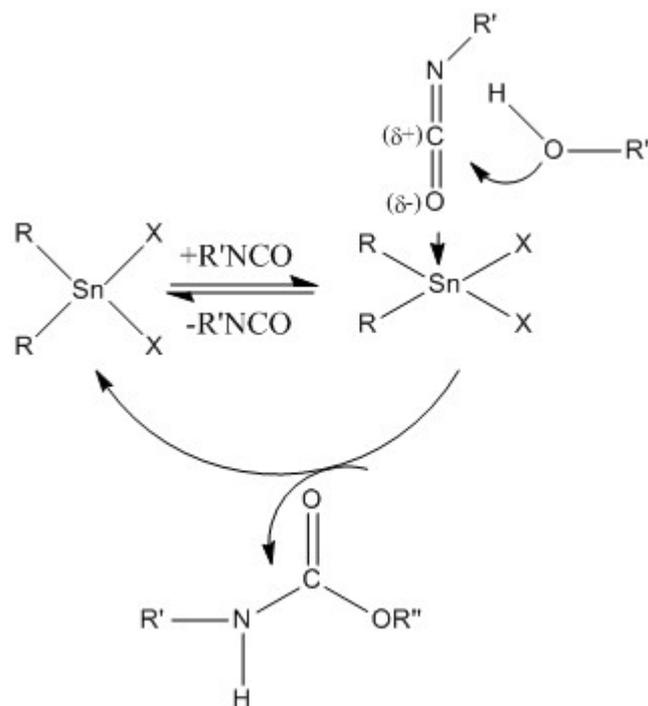

**Scheme 1S a).** Insertion mechanism: Mechanism of alkoxide formation and urethane catalysis.

In the insertion mechanism, the organotin catalyst will undergo a series of reactions to form the alkoxide intermediate. Three steps are involved in the reaction:

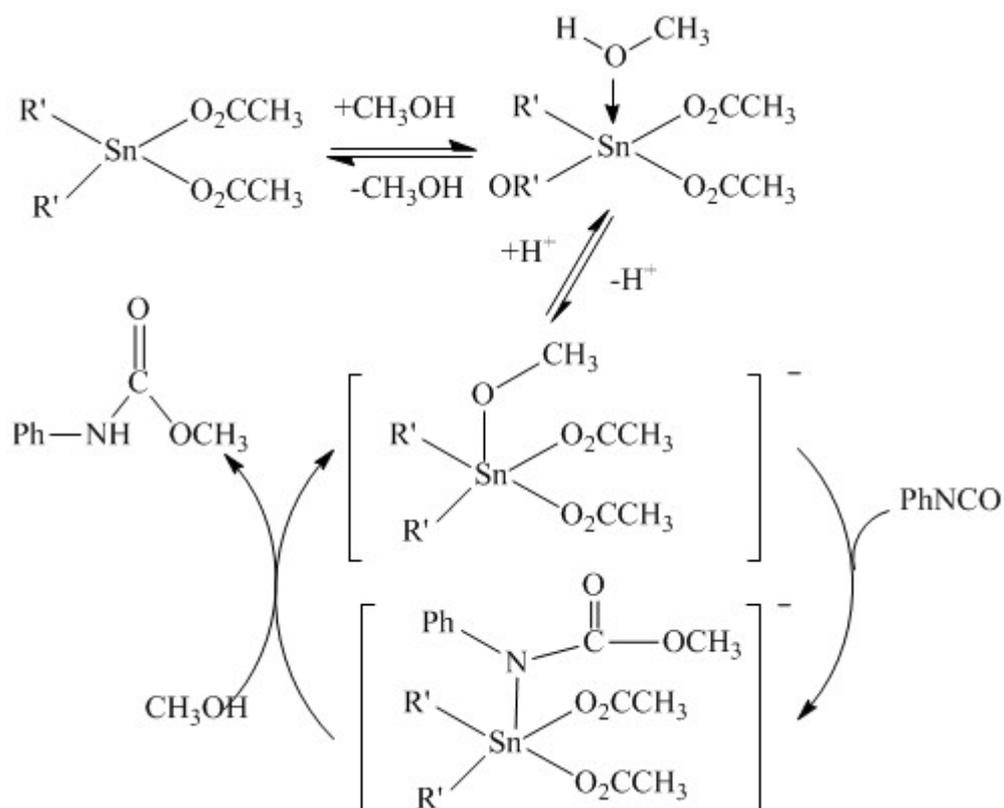

- 1) Association exchange of alcohol into the tin compound to form the alkoxide
- 2) Coordination of the isocyanate with the alkoxide to form the stanyl carbamate
- 3) Exchange of the stanyl carbamate with an alcohol molecule to regenerate the alkoxide intermediate

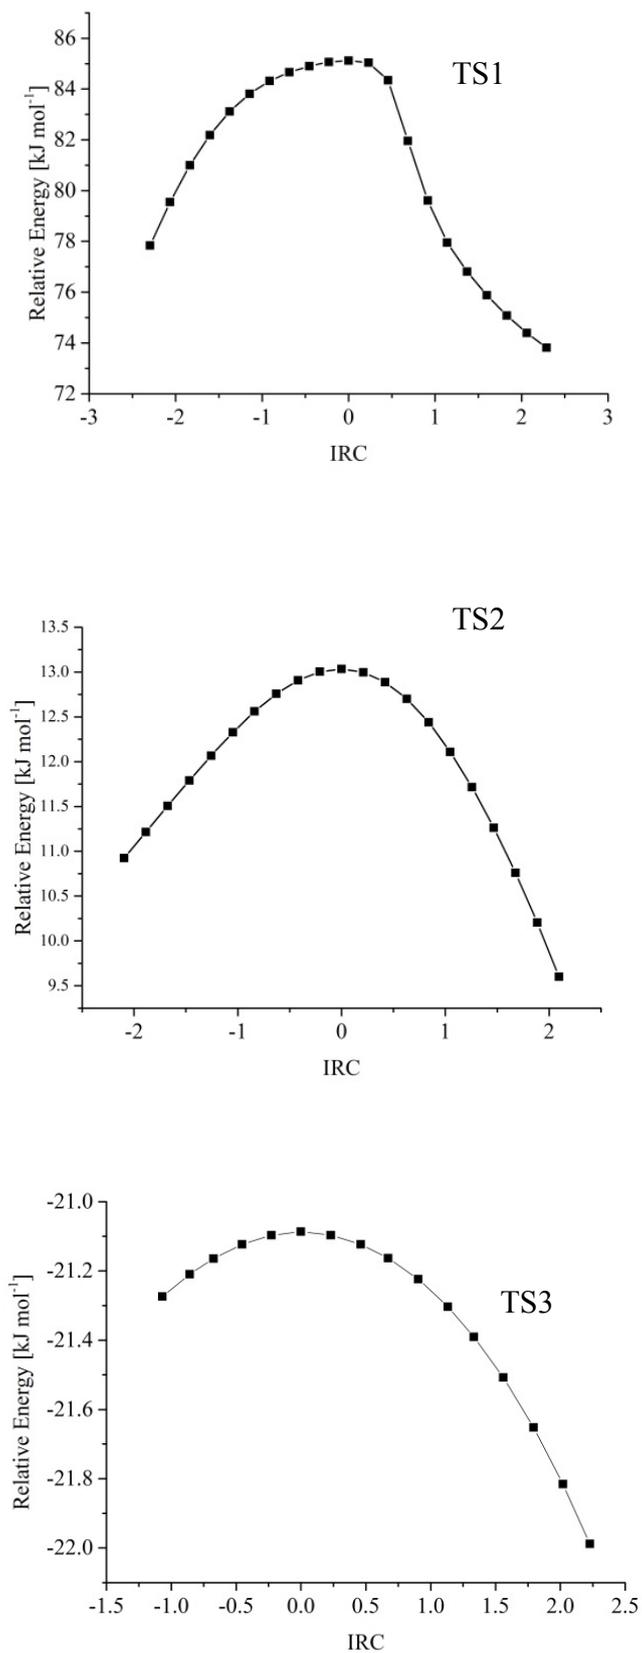

**Scheme 1S b).** Lewis interaction between isocyanate oxygen and tin atom of the organotin compound in urethane formation.

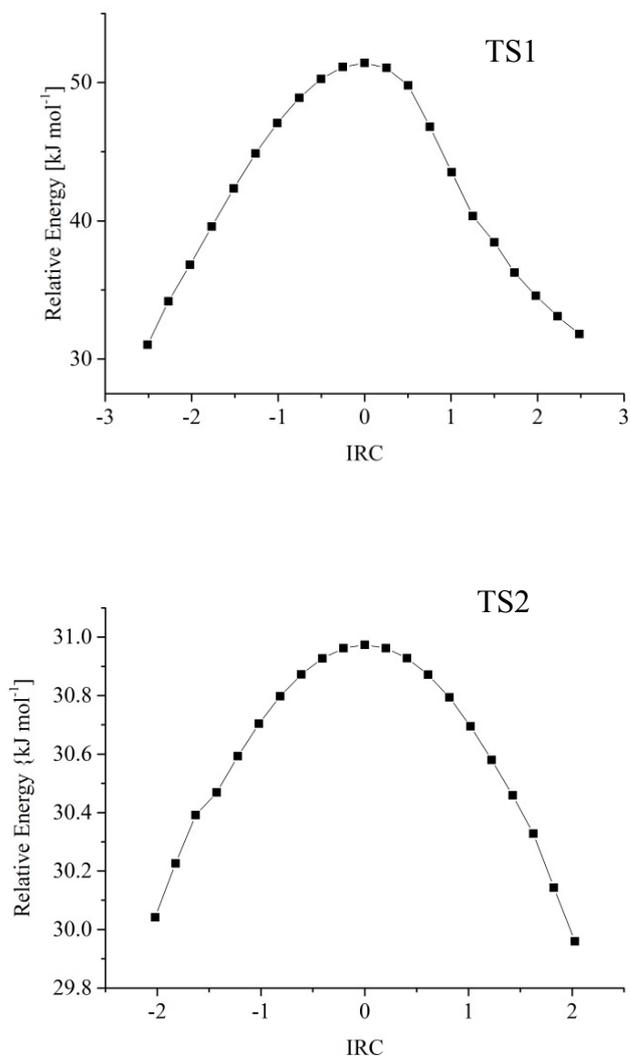

**Scheme 1S c).** Ionic mechanism for tin catalyzed urethane formation.

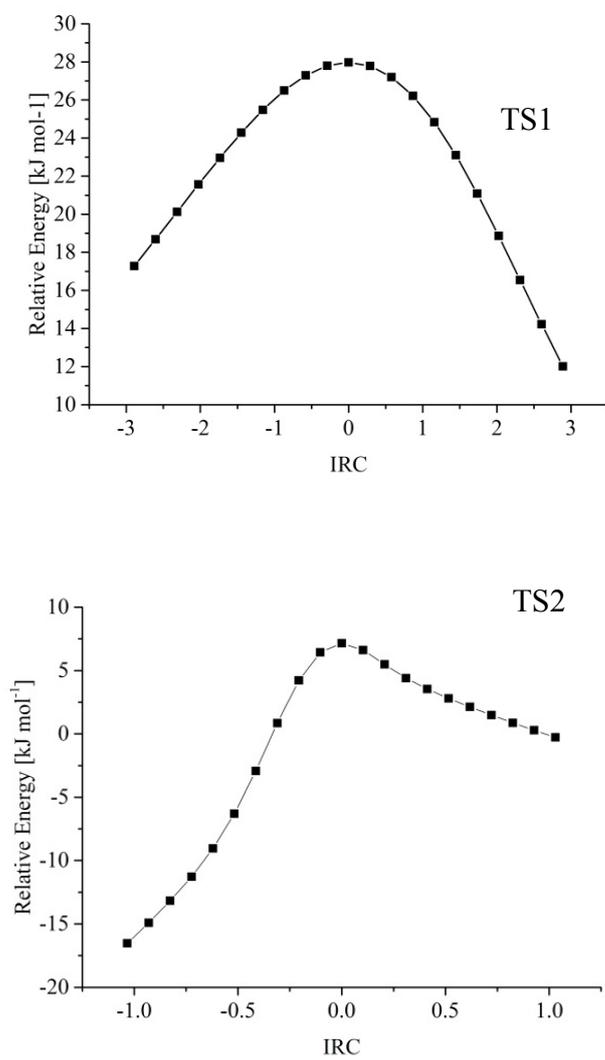

**Figure 1S.** IRC for the transition states TS1 ,TS2 and TS3 for the interaction between DMTDA, methanol and methyl isocyanate.

**Figure S2.** IRC for TS1 and TS2 for the interaction between DMTMA, methanol and methyl isocyanate (O-coordinated interaction).

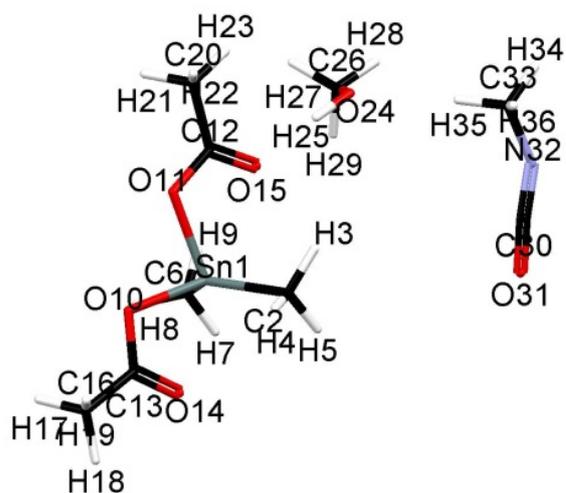

**Figure S3.** IRC TS1 for TS2 for the interaction between DMTMA, methanol and methyl isocyanate (N-coordinated interaction).

**Tables S1.** Coordinates of the structures shown in Figure 10.
