

### Supplementary data

**Supplementary Figure I:** OxPAPC-induced IL-8 release on U-937 macrophages at different time intervals. Data represent mean  $\pm$  SEM of at least 3 independent experiments. \*\* $p < 0.01$ , \*\*\* $p < 0.001$  versus negative control.

**Supplementary Figure II:** OxPAPC-induced MCP-1 release on U-937 macrophages at different time intervals. Data represent mean ± SEM of at least 3 independent experiments. \* $p < 0.05$ , \*\* $p < 0.01$ , \*\*\* $p < 0.001$  versus negative control.

**Supplementary Figure III:** Percentage of inhibition (%) on IL-8 and MCP-1 release induced by OxPAPC on PMA-different U-937 macrophages treated with simvastatin at 6 and 9 hours, respectively. Data represent mean  $\pm$  SEM of at least 3 independent experiments. \*\* $p < 0.01$ , \*\*\* $p < 0.001$  versus negative control.
