

S1a:

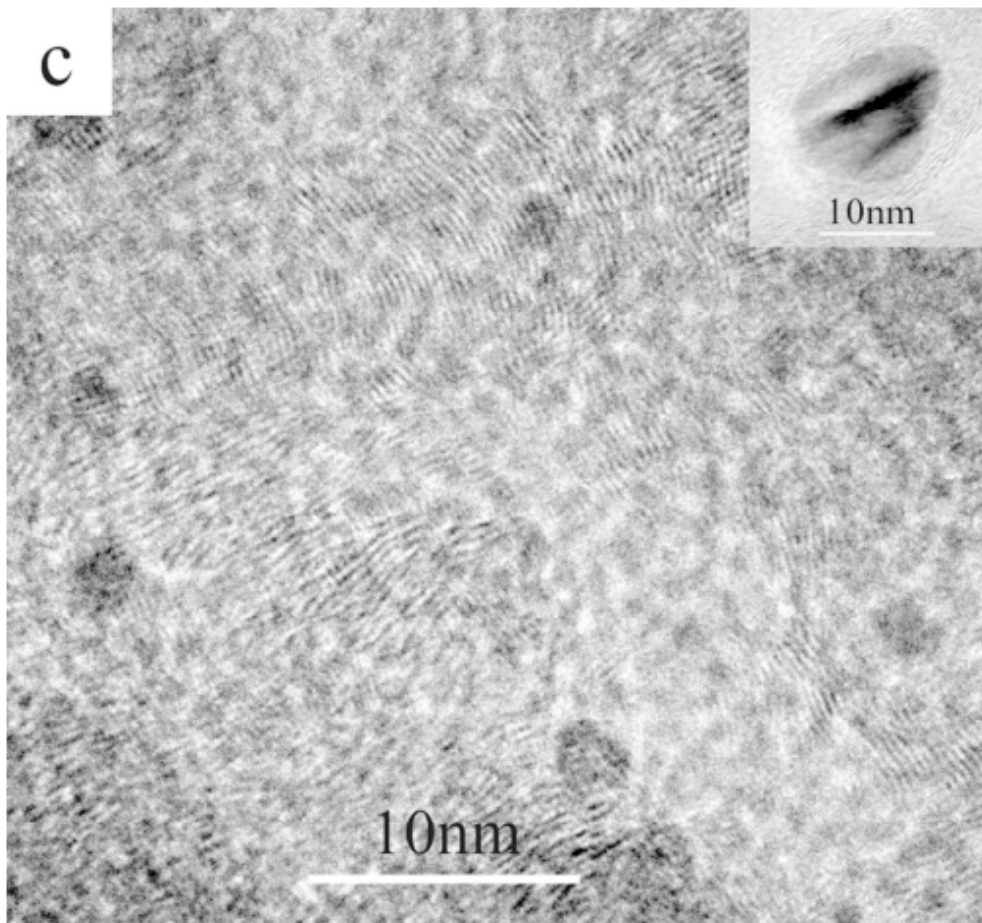

TEM images of catalyst particles after the CVD process performed at 500 °C with Ni used as catalyst  
70x60mm (300 x 300 DPI)

S1b:

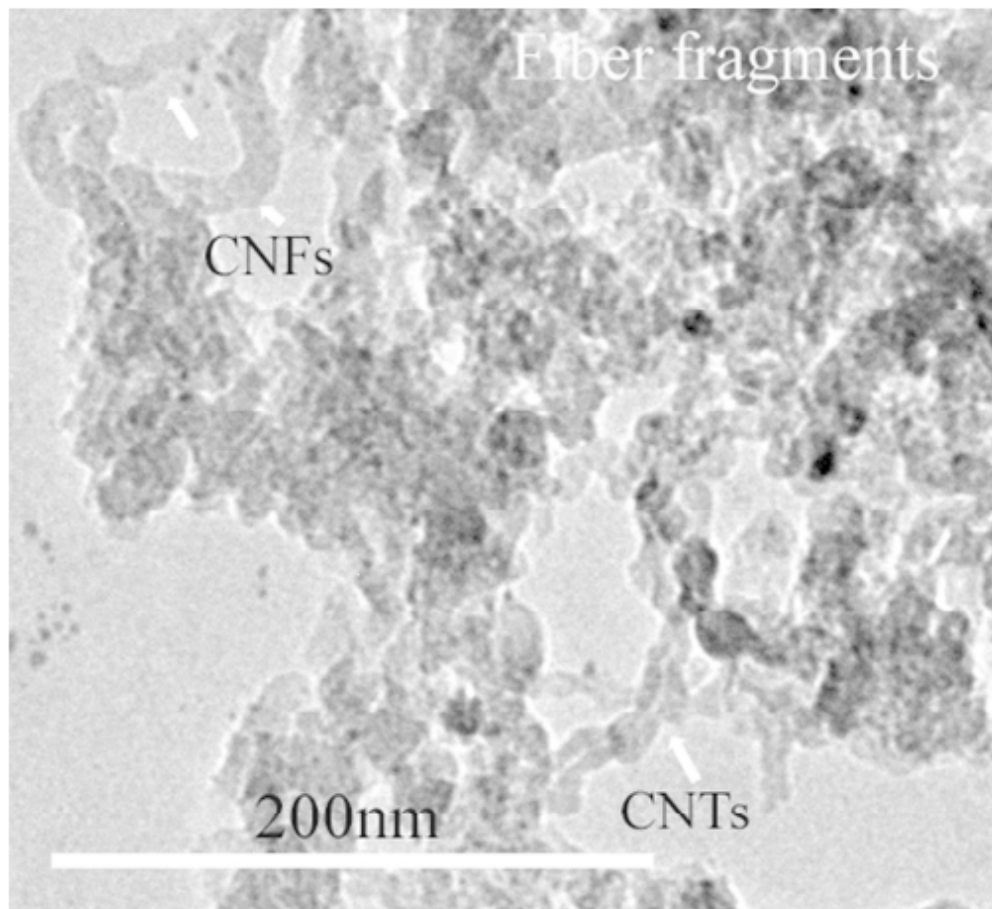

TEM images of catalyst particles after the CVD process performed at 500 °C with Fe used as catalyst  
70x61mm (300 x 300 DPI)

S1c:

TEM images of catalyst particles after the CVD process performed at 600 °C with Ni used as catalyst  
70x65mm (300 x 300 DPI)

S2:

TEM images of final carbon products synthesized on carbon fibers at 550 °C with Ni used as catalyst  
70x63mm (300 x 300 DPI)
