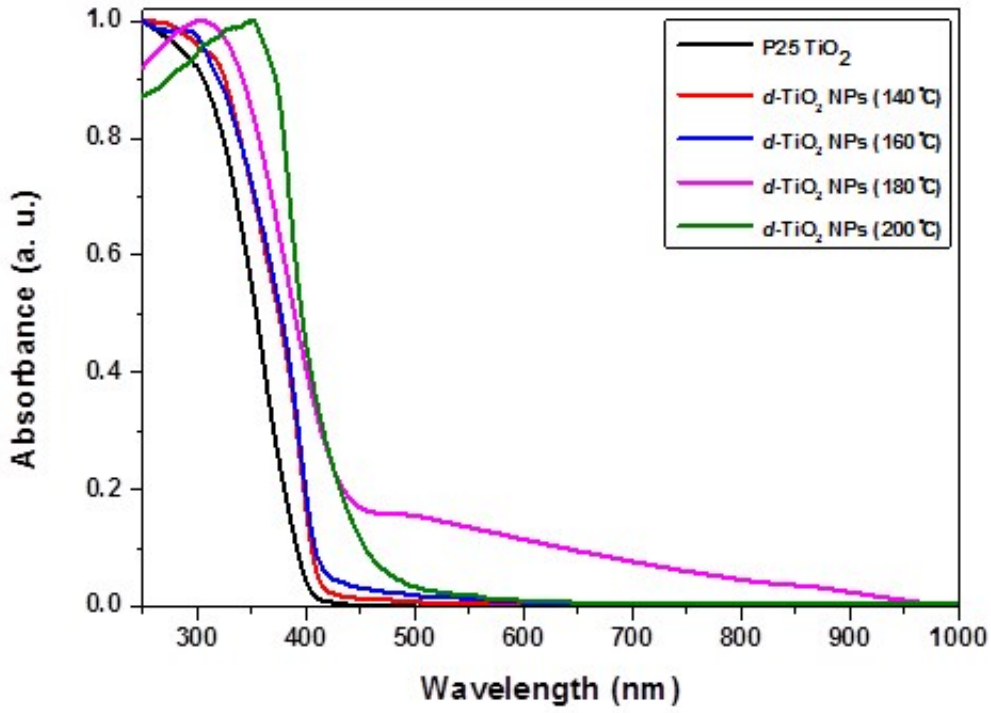

Figure S1. UV-visible diffuse reflectance absorption spectra of *d*-TiO_2 NPs obtained by hydrothermal reaction at different temperatures.

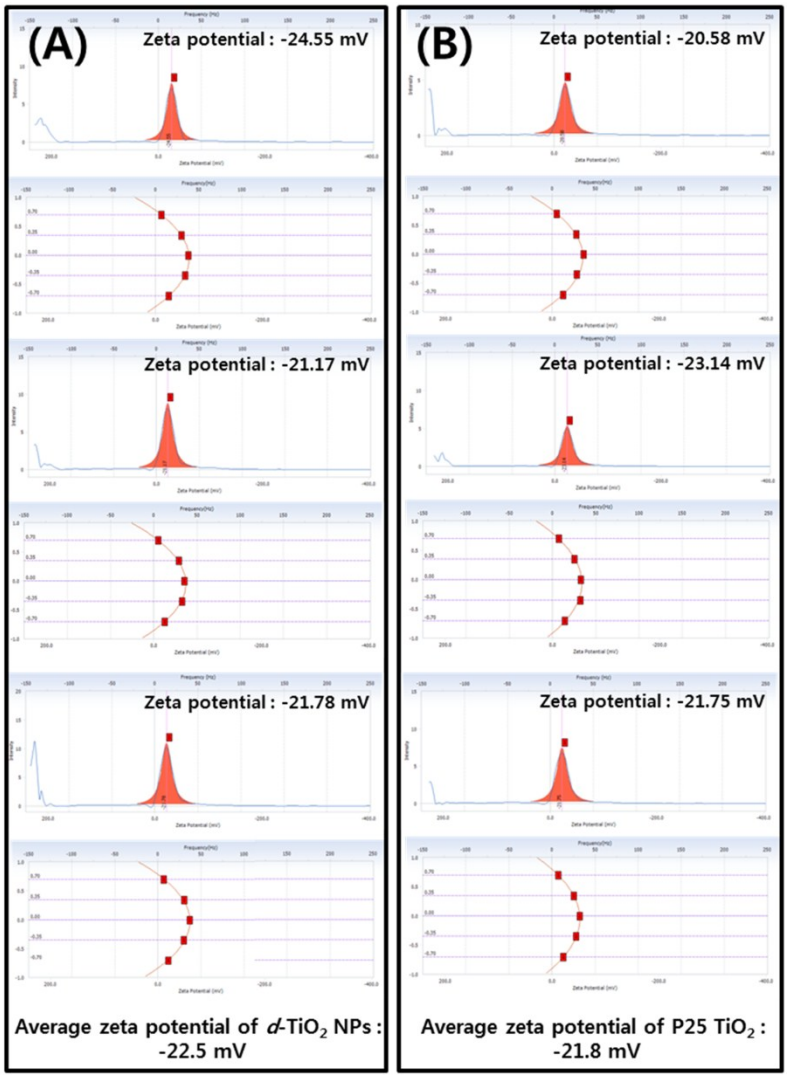

Figure S2. Surface charge or zeta potential of *d*-TiO_2 NPs (A) and P25 TiO_2 (B) were measured in deionized water at pH 7.0 by laser Doppler velocimetry (LDV).

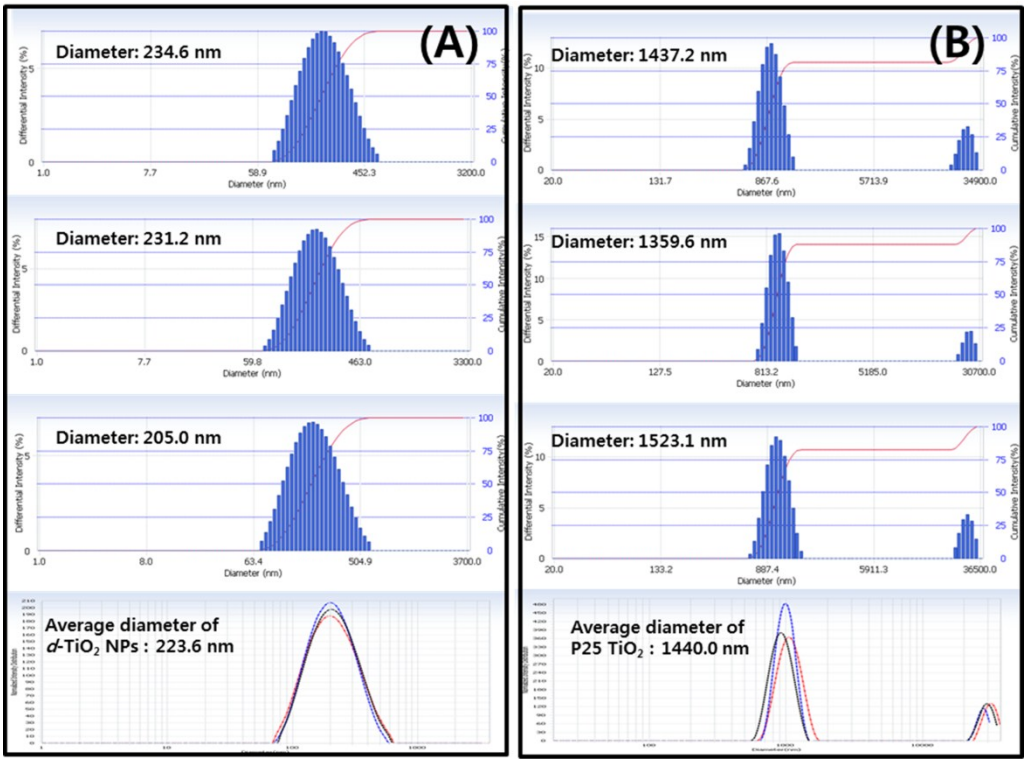

Figure S3. Size measurements were performed with *d*-TiO_2 NPs (A) and P25 TiO_2 (B) in deionized water at pH 7.0 by dynamic light scattering (DLS).
