The total grafting rate ($r_{CD\&Azo}$) of CD and Azo in supramolecular hydrogel Gel-1, Gel-2 and Gel-3:

$$r_{CD\&Azo} = \frac{r_{CD}n_{HP} + r_{Azo}n_{GP}}{n_{HP} + n_{GP}}$$

Where, r_{CD} is the CD grafting rate in host polymer (HP), r_{Azo} is the Azo grafting rate in guest polymer (GP); n_{HP} is the amount (mol) of repeating units in host polymer in supramolecular hydrogel, n_{GP} is the amount (mol) of repeating units in guest polymer in supramolecular hydrogel.

$$r_{CD} \cdot n_{HP} = r_{Azo} \cdot n_{GP}$$

Figure S1. IR spectra of P(MVE-*alt*-MA)-*g*- β -CD (A) and P(MVE-*alt*-MA)-*g*-Azo (B); ^1H NMR spectra of P(MVE-*alt*-MA)-*g*- β -CD (C) and P(MVE-*alt*-MA)-*g*-Azo (D).

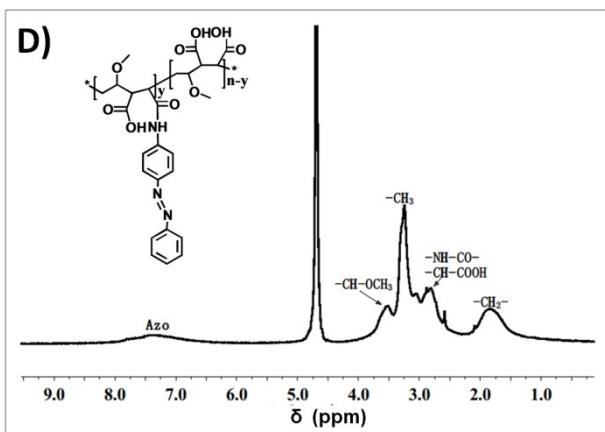

Figure S2. Cytotoxicity of SKOV3 cultured in Gel-1, Gel-2, and Gel-3 for 48h.
