

Title of video: Droplets of hyaluronic acid/chitosan coacervates.

Keywords: Complex coacervation, polyelectrolytes, hyaluronic acid, chitosan, self-assembly, semiflexible.

Video legend: Moving circular objects are coacervate microdroplets made of hyaluronic acid and chitosan. Charge ratio of $[-]/[+] = 0.46$, ionic strength = 0.05 M, pH = 3.0, degree of deacetylation of chitosan = 83%.
