Fig. S1 (a) Structures of complex **1**. Hydrogen atoms and methyl group in 3,5-dimethylpyrazole have been omitted for clarity. (b) The molecular packing of **1** in $1.5 \times 2.5 \times 2.5$ at the *c* orientation, which demonstrates the arrangements of anisotropic axis of Co^{II} are in a same orientations. The shortest distance of paramagnetic Co^{II} ions between neighbor clusters are 8.825 Å.
