

Supplemental Fig. 1

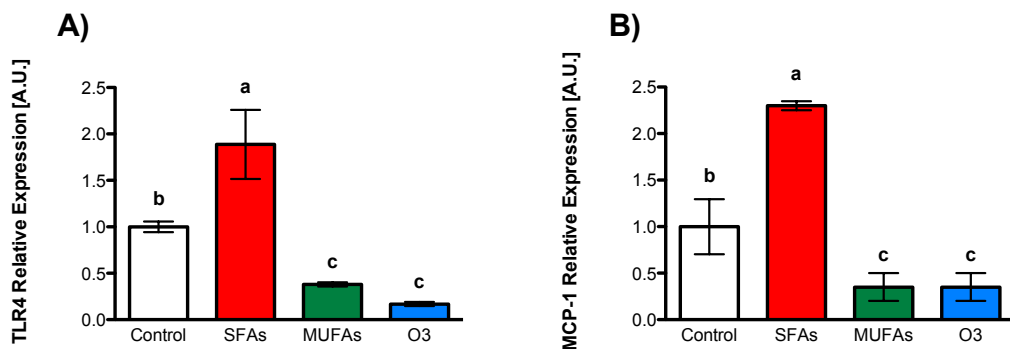

Fig. S1. Gene expression relative to control untreated cells of TLR4 (A) and MCP-1 (B) after the treatment with postprandial TRLs (SFAs, MUFAs, and MUFAs+omega-3 PUFAs as O3) at 100 μg TG/mL for 24 h. Values are presented as means \pm SD (n = 3). Different letters denote statistical differences (P < 0.05).
