

**Figure S1.** Immunodetection of (A–D) LYVE-1 (red) and (E–H) DAPI (blue) on day 6 by confocal microscopy.

**Figure S2.** Higher magnification images of (A, B) ICAM-1 (magenta) immunoreactivity and (C, D) DAPI staining (blue), and of (E, F) VAP-1 immunoreactivity (green) and (G, H) DAPI staining (blue) on day 6 detected by confocal imaging.

**Figure S3.** Higher magnification images of (A, B) Stabilin-1 immunoreactivity (magenta) and (C, D) DAPI staining (blue) on day 6 detected by confocal imaging.

**Figure S4.** Higher magnification images of (A, B) ICAM-1 immunoreactivity (magenta) and (C, D) DAPI staining (blue) on day 6 detected by confocal imaging after TNF- $\alpha$  stimulation
