

1 **Supplementary Figure captions**

2 Figure S1. Three isotope plot of individual blocks in a single measurement run for 5ng of
3 NIST981 Pb standard material with the heating rate of 8 mA/min. Red circle represents the
4 average of cycles in a block. The MDF line (black line) and the ^{204}Pb error line (blue dotted
5 line) are drawn to pass through the value of the integrated intensity ratio. The number of
6 the plot (#1 to 20) is block number.
