Table S1. The calculated values of interfacial energy (γ_{12}) of the polymer pairs…S3

Figure S1. Optical images of the droplet of distilled water and glycerol on the neat PCL and amorphous and cold-crystallized PLA sheet samples (20 ^{o}C)……S4

Figure S2. DSC therograms of the neat PCL and its blend samples at various cooling rates……S5

Figure S3. Plots of relative crystallinity (X_t%) versus time for the neat PCL and its blend samples at various cooling rates……S6

Table S1. The calculated values of interfacial energy (γ_{12}) of the polymer pairs (20 °C)

γ_{12} (mN·m^{-1})	PCL/amorphous PLA	PCL/crystallized PLA
geometric-mean *eq.*	4.4	0.1
harmonic-mean *eq.*	8.2	0.2

	distilled water	glycerol
neat PCL		
amorphous PLA		
crystallized PLA
