

Fig. S1 Surface tension (γ) as a function of time for air-water interface stabilized by (A) pure ZP/ZP-TA mixture, and (B) pure ZTP/ZTP-TA mixture.

Fig. S2 Images of foams taken immediately (a) and 5 min (a') after whipping of 15 mL of solution. Left to right: ZP, ZP-0.6 mM SDS, ZP-TA (TA, 2 mg/mL), ZTP, ZTP-TA (TA, 2 mg/mL). The protein concentration is 1%, w/v.
