

## Supporting information

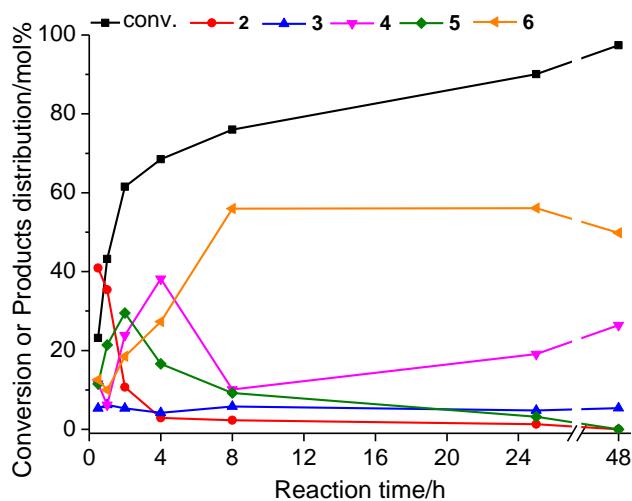

**Mechanism studies on the VO(acac)<sub>2</sub>-catalyzed oxidative cleavage of lignin model compounds in acetic acid**

Yangyang Ma,<sup>a,b</sup> Zhongtian Du,<sup>c</sup> Fei Xia<sup>a,b</sup> Jiping Ma,<sup>a</sup> Jin Gao<sup>a</sup> and Jie Xu\*<sup>a</sup>

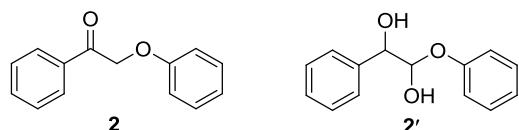

## Additional results

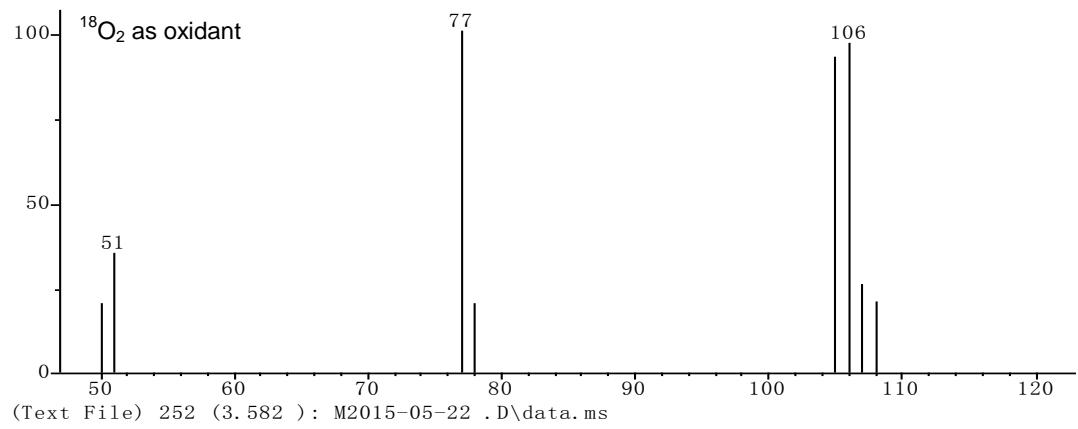

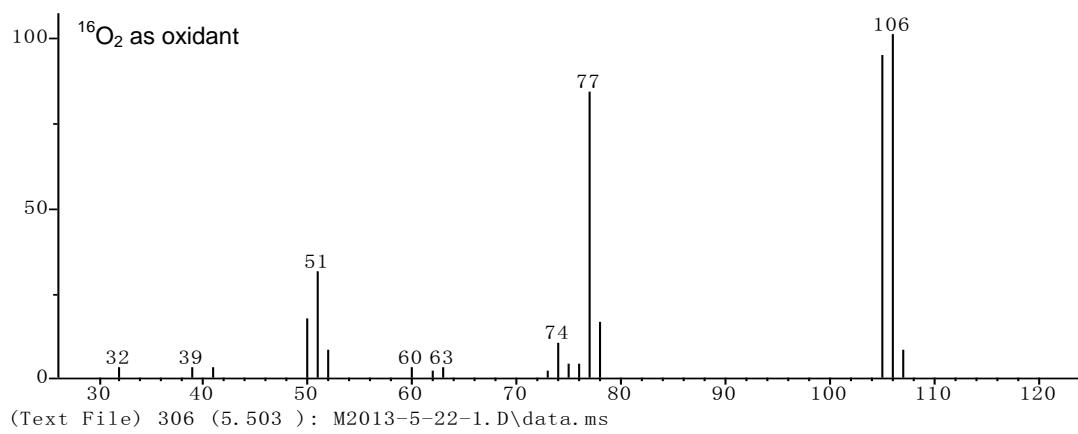

**Figure S1** VO(acac)<sub>2</sub>-catalyzed oxidation of **1** in acetic acid under different reaction temperatures.

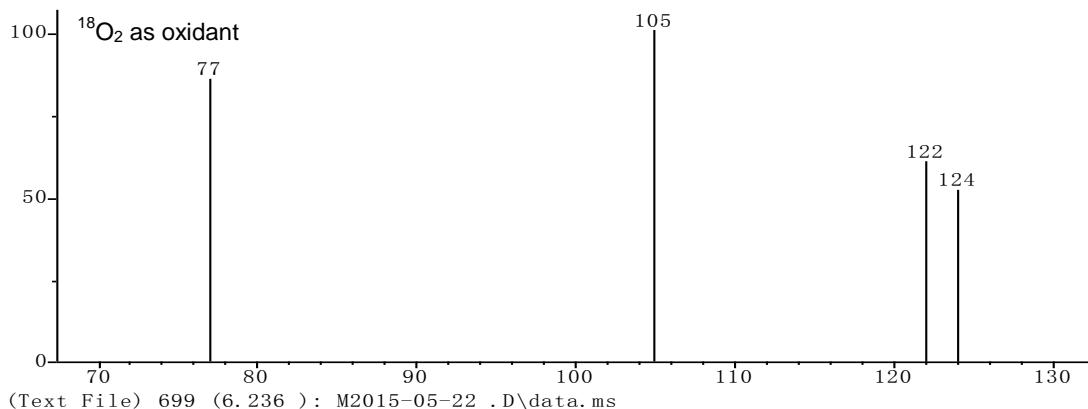

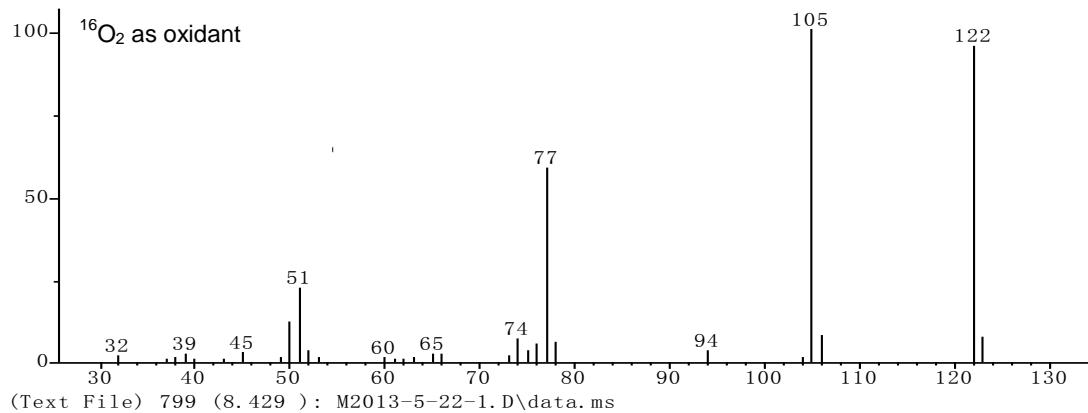

**Figure S2** Time course of VO(acac)<sub>2</sub>-catalyzed oxidation of **1** in acetic acid. Reaction conditions: 0.25 mmol model compound **1**, 0.025 mmol VO(acac)<sub>2</sub>, 0.5 mL solvent, 80 °C, 8 h, 1 atm O<sub>2</sub>.

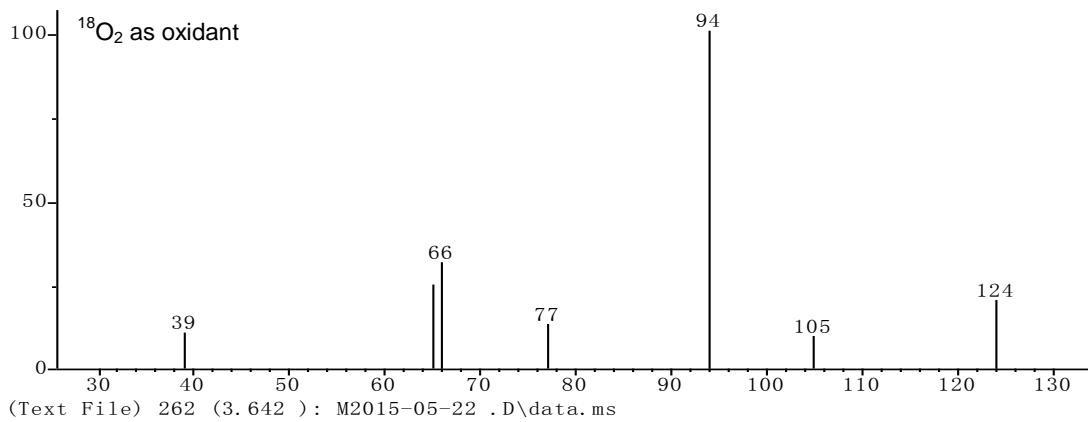

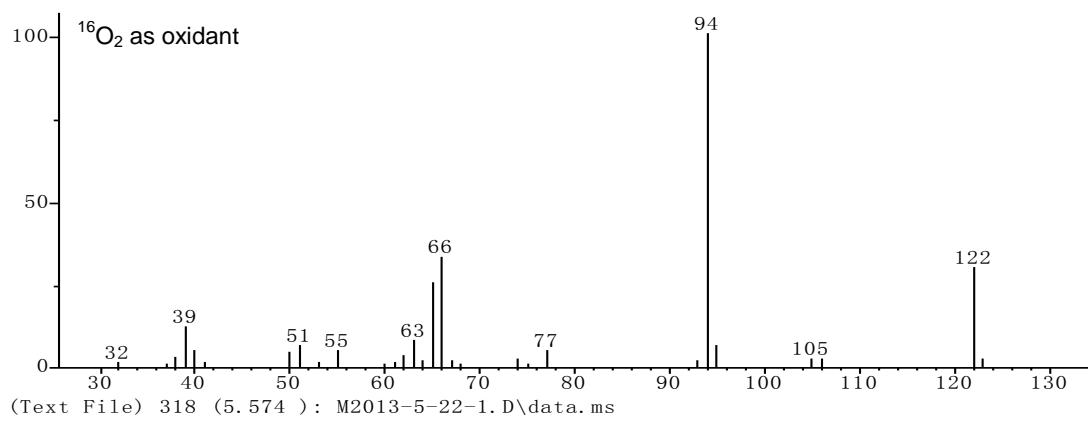

**Scheme S1** The supposed reaction intermediates in the VO(acac)<sub>2</sub>-catalysed oxidation of 2-phenoxy-1-phenylethanol in acetic acid.

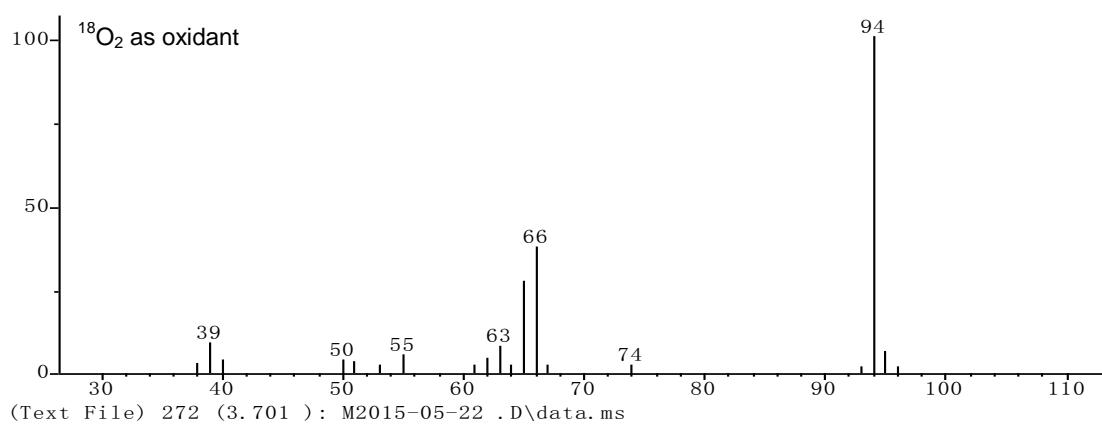

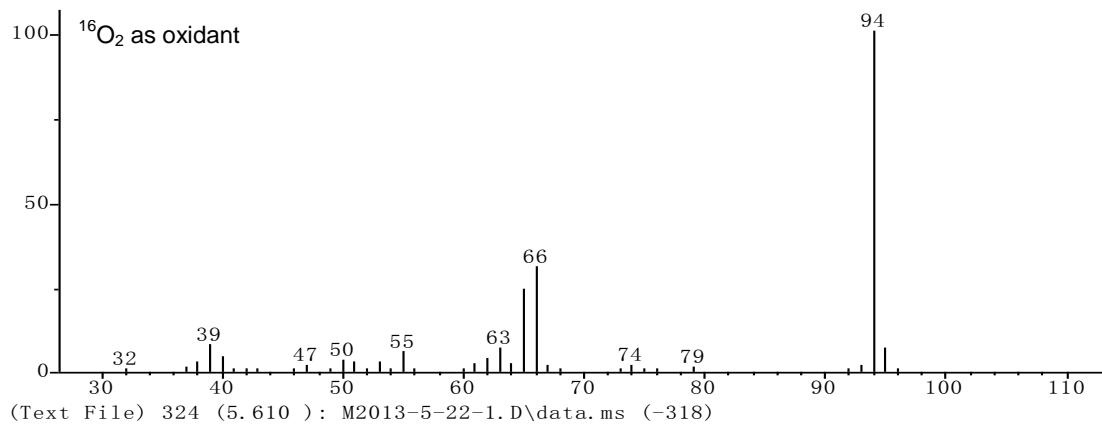

**Figure S3** Mass spectra of benzaldehyde.

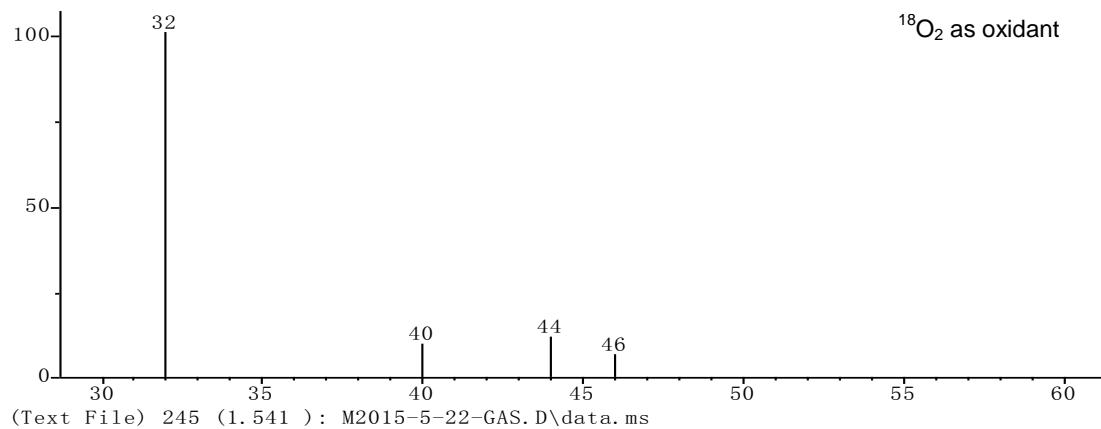

**Figure S4** Mass spectra of benzoic acid.

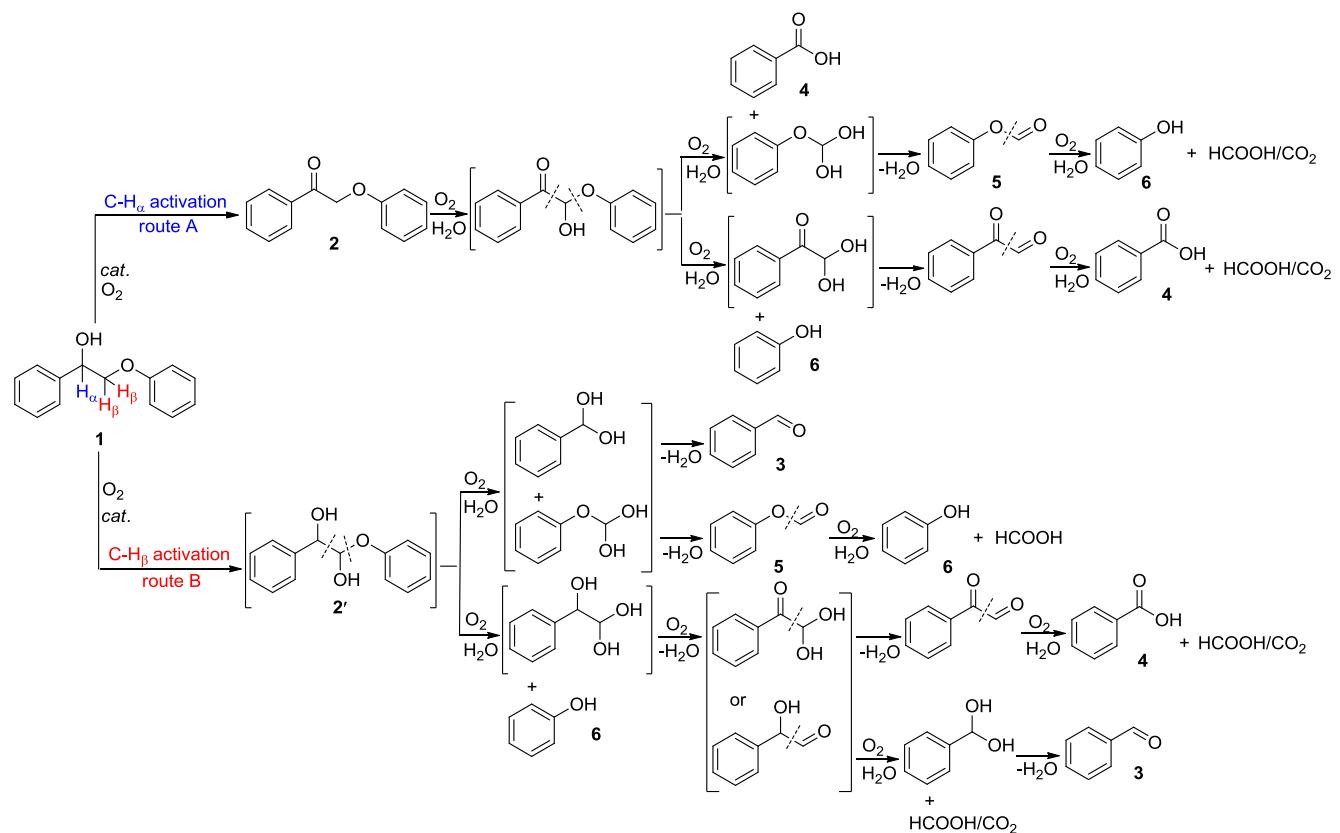

**Figure S5** Mass spectra of phenyl formate.

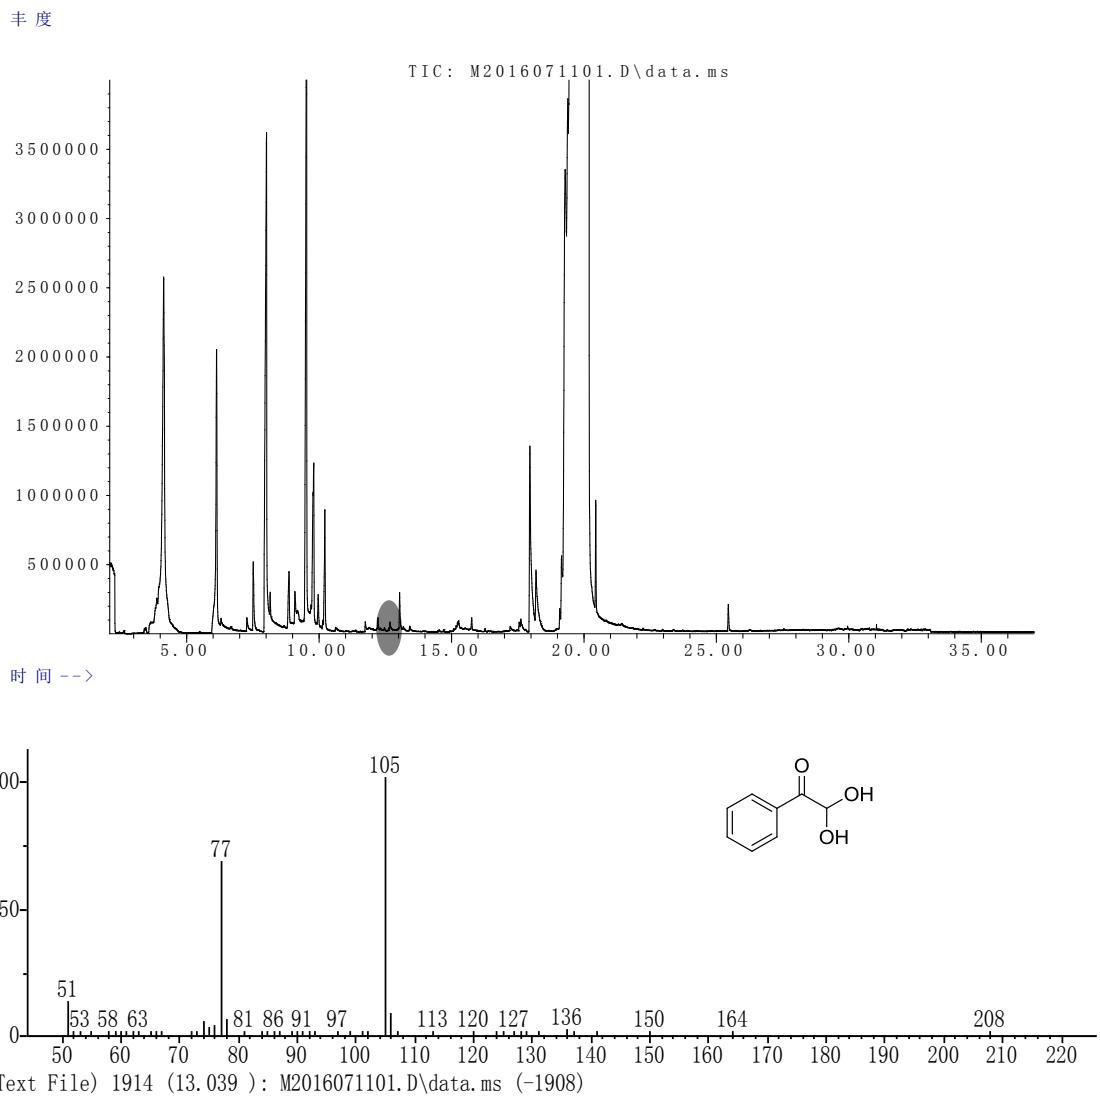

**Figure S6** Mass spectra of phenol.

**Figure S7** Mass spectra for carbon oxide detected in VO(acac)<sub>2</sub>-catalyzed oxidation of 2-phenoxy-1-phenylethanol in acetic acid when employing <sup>18</sup>O<sub>2</sub> as the oxidant.

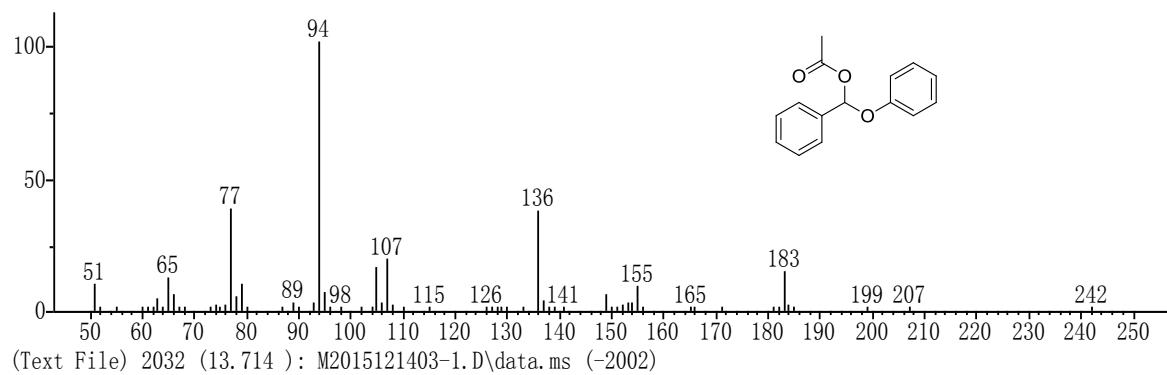

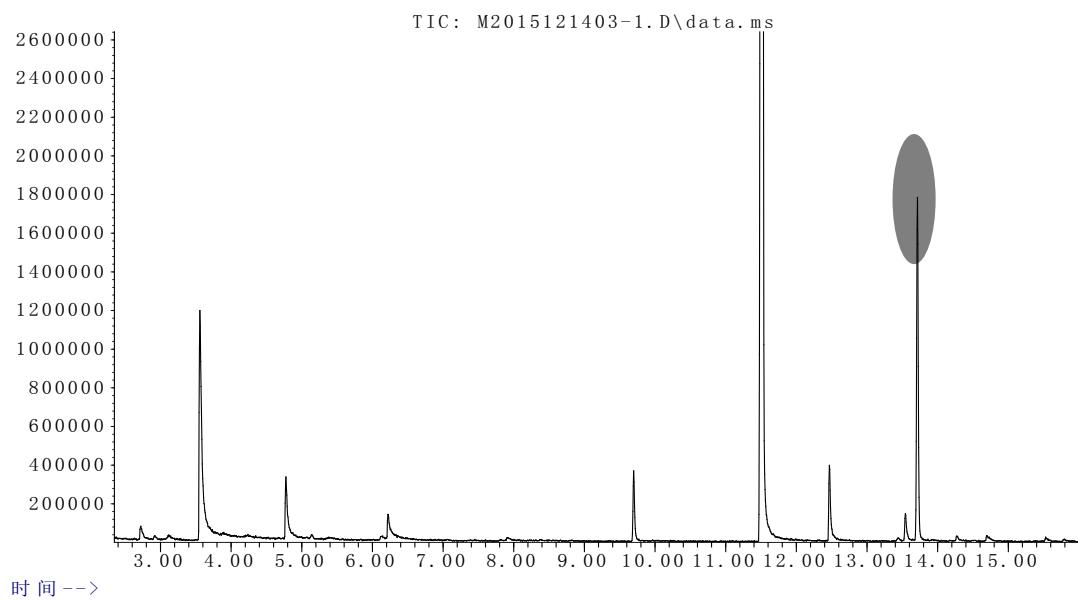

**Scheme S2** The proposed detailed reaction pathways for VO(acac)<sub>2</sub>-catalyzed oxidative cleavage of 2-phenoxy-1-phenylethanol in acetic acid.

**Figure S8** Mass spectra for reaction products in  $\text{VO}(\text{acac})_2$ -catalyzed oxidation of lignin model compound **1** in acetonitrile. Reaction condition: 0.25 mmol model compound **1**, 0.025 mmol  $\text{VO}(\text{acac})_2$ , 0.5 mL solvent, 80 °C, 1 atm  $\text{O}_2$ , 1 h.

丰 度

**Figure S9** Mass spectra for reaction products in  $\text{VO}(\text{acac})_2$ -catalyzed oxidation of benzyl phenyl ether in the mixture of acetic acid and acetic anhydride ( $v/v=1:1$ ).
