Preparation of iron oxide nanoparticles with Y-shaped ligands for brain tumor targeting

Gwangjin Noh ^a, Yu Seok Youn ^b, Eun Seong Lee ^{a,*}

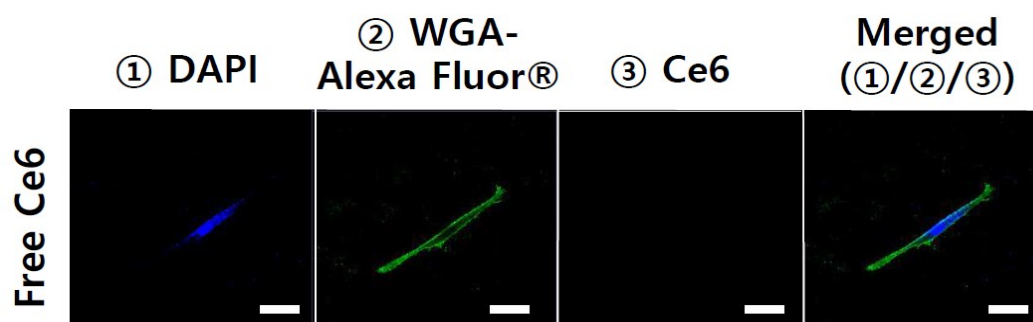

Fig. S1. Confocal images of U87-MG cells treated with free Ce6 (10 $\mu\text{g}/\text{mL}$) for 4 h at 37 $^{\circ}\text{C}$. The treated cells were stained using DAPI and WGA-Alexa Fluor[®] 488 (bar scale: 10 μm).
