## checkCIF publication errors

### Alert level A

|                                   |                                                                                                                                                  |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">PUBL004_ALERT_1_A</a> | The contact author's name and address are missing,<br>publ contact author name and publ contact author address.                                  |
| <a href="#">PUBL005_ALERT_1_A</a> | publ contact author email, publ contact author fax and<br>publ contact author phone are all missing.<br>At least one of these should be present. |
| <a href="#">PUBL006_ALERT_1_A</a> | publ requested journal is missing<br>e.g. 'Acta Crystallographica Section C'                                                                     |
| <a href="#">PUBL008_ALERT_1_A</a> | publ section title is missing. Title of paper.                                                                                                   |
| <a href="#">PUBL009_ALERT_1_A</a> | publ author name is missing. List of author(s) name(s).                                                                                          |
| <a href="#">PUBL010_ALERT_1_A</a> | publ author address is missing. Author(s) address(es).                                                                                           |

- 
- 6 **ALERT level A** = Data missing that is essential or data in wrong format
  - 0 **ALERT level G** = General alerts. Data that may be required is missing

---

### Publication of your CIF

You should attempt to resolve as many as possible of the alerts in all categories. Often the minor alerts point to easily fixed oversights, errors and omissions in your CIF or refinement strategy, so attention to these fine details can be worthwhile. In order to resolve some of the more serious problems it may be necessary to carry out additional measurements or structure refinements. However, the nature of your study may justify the reported deviations from journal submission requirements and the more serious of these should be commented upon in the discussion or experimental section of a paper or in the "special\_details" fields of the CIF. *checkCIF* was carefully designed to identify outliers and unusual parameters, but every test has its limitations and alerts that are not important in a particular case may appear. Conversely, the absence of alerts does not guarantee there are no aspects of the results needing attention. It is up to the individual to critically assess their own results and, if necessary, seek expert advice.

If level A alerts remain, which you believe to be justified deviations, and you intend to submit this CIF for publication in a journal, you should additionally insert an explanation in your CIF using the Validation Reply Form (VRF) below. This will allow your explanation to be considered as part of the review process.

### Validation response form

Please find below a validation response form (VRF) that can be filled in and pasted into your CIF.

```
# start Validation Reply Form

```

If you wish to submit your CIF for publication in Acta Crystallographica Section C or E, you should upload your CIF via [the web](#). If you wish to submit your CIF for publication in IUCrData you should upload your CIF via [the web](#). If your CIF is to form part of a submission to another IUCr journal, you will be asked, either during electronic [submission](#) or by the Co-editor handling your paper, to upload your CIF via our web site.
