

## An integrated antiarrhythmic target network of compound Chinese medicine Wenxin Keli revealed by a combined machine learning and molecular pathway analysis

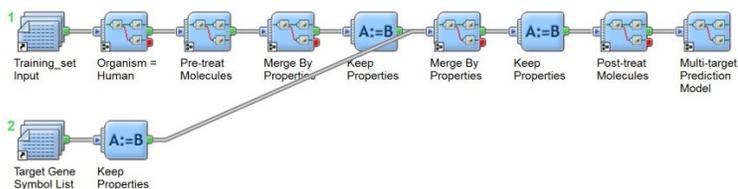

Figure S1 Protocol for establishing multi-target prediction model

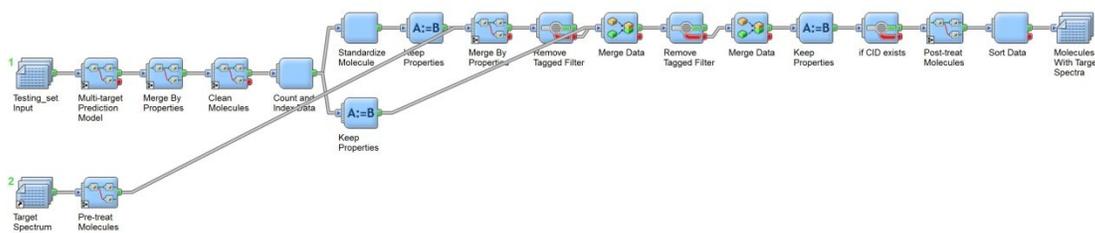

Figure S2 Protocol for outputting the target spectrum for testing molecules

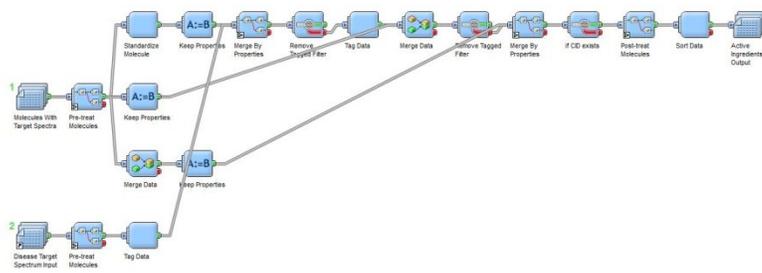

Figure S3 Protocol for overlapping the component and disease target spectra.

Table S1 Components of five herbs in Wenxin Keli

Library_Index	Component_Name	PubChem_CID	ChemSpider_ID	Chemdraw_ID
dangshen_004	taraxeryl acetate	94225
