Supporting Information S2. A simplified but intuitive way to express the distribution of the 978 plant proteins in the 12 subcellular locations, where the occurrence of a protein is marked with the symbol @. For instance, the protein code A1E9S2 occurs in the 3rd location site only; protein A8MQY1 occurs in both the 5th and 9th sites; and so forth. See the main text and Table 1 as well as Supporting Information S1 for further explanation.

Protein code	Subcellular location											
	1	2	3	4	5	6	7	8	9	10	11	12
