

Surface-tension-confined assembly of metal–organic framework in femtoliter droplet arrays

Zhongsheng WU^a, Yinyin LIN^a, Juanjuan XING^b, Mengying Zhang^c and Jinbo WU^{* a}

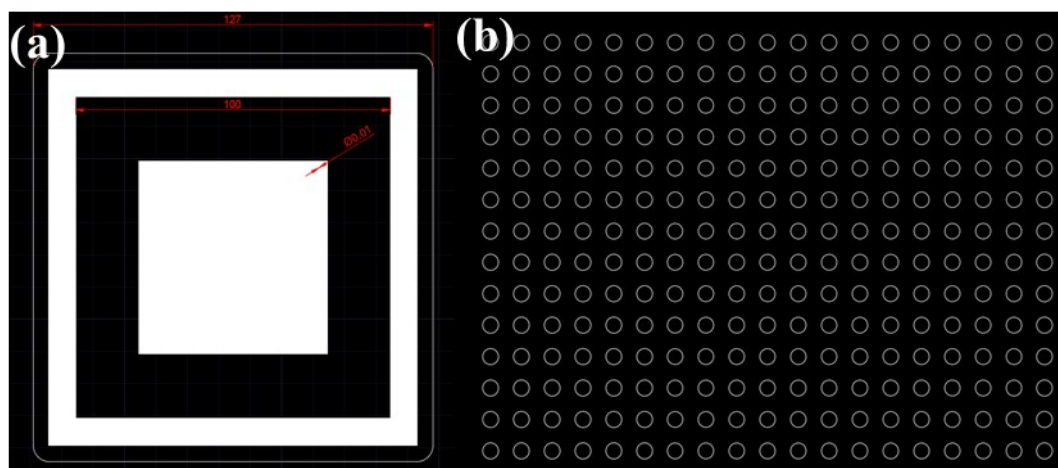

Figure S1. The transparency mask including holes in array whose droplet diameter is 10 μm . (a) Schematic view of the transparency mask; (b) Concept diagram of holes in array.

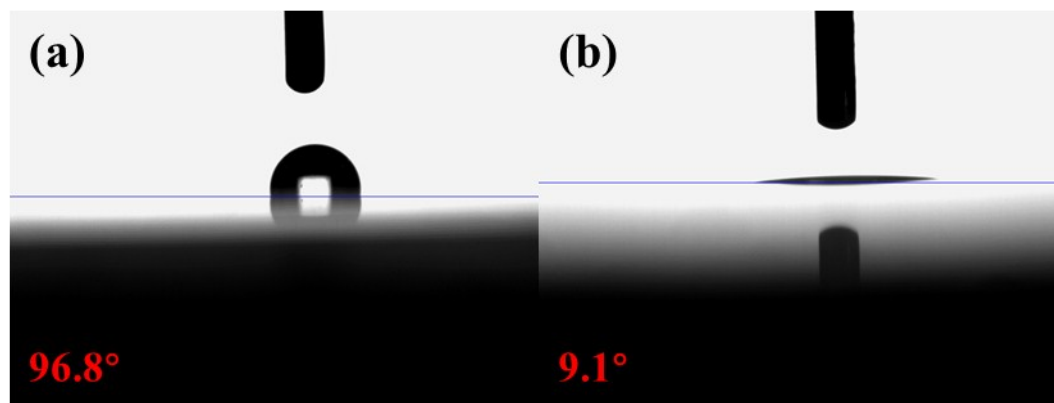

Figure S2. Static contact angles of SoF solution on the wettable and nonwetable surface. (a) Static contact angle of SoF solution on the nonwetable surface of glass substrate; (b) Static contact angle of SoF solution on the nonwetable surface of glass substrate.
