

Supplementary information

Table S1. Product yield from in-situ catalytic pyrolysis.

| Run Order | Temp | C/B | Bio-oil yield (wt. %) | Biochar yield (wt. %) | Syngas yield (wt. %) |
|-----------|--------|-------|-----------------------|-----------------------|----------------------|
| 1 | 400 | 0.625 | 16 | 23.65 | 60.35 |
| 2 | 350 | 1 | 13.75 | 23 | 63.25 |
| 3 | 350 | 0.25 | 15.7 | 18.8 | 65.5 |
| 4 | 400 | 1.15 | 12.25 | 18.65 | 69.1 |
| 5 | 400 | 0.625 | 18.15 | 20.2 | 61.65 |
| 6 | 400 | 0.625 | 18.75 | 25.85 | 55.4 |
| 7 | 400 | 0.094 | 25.5 | 14.5 | 60 |
| 8 | 400 | 0.625 | 18.65 | 24.7 | 56.65 |
| 9 | 329.28 | 0.625 | 10.25 | 17.5 | 72.25 |
| 10 | 450 | 0.25 | 19.35 | 20 | 60.65 |
| 11 | 450 | 1 | 14.6 | 18.5 | 66.9 |
| 12 | 400 | 0.625 | 20.55 | 17 | 62.45 |
| 13 | 470.71 | 0.625 | 17.1 | 20.5 | 62.4 |

Table S2. Product yield from ex-situ catalytic pyrolysis.

| Run Order | Temp | C/B | Bio-oil yield (wt. %) |
|-----------|---------|----------|-----------------------|
| 1 | 300 | 0.1 | 25.26 |
| 2 | 400 | 0.215 | 23.1 |
| 3 | 400 | 0.052365 | 32 |
| 4 | 400 | 0.215 | 23.63 |
| 5 | 500 | 0.1 | 26.6 |
| 6 | 300 | 0.33 | 20.03 |
| 7 | 400 | 0.215 | 27.5 |
| 8 | 500 | 0.33 | 20.76 |
| 9 | 400 | 0.215 | 28.7 |
| 10 | 258.579 | 0.215 | 23.23 |
| 11 | 400 | 0.215 | 25.53 |
| 12 | 541.421 | 0.215 | 24.73 |
| 13 | 400 | 0.377635 | 23.03 |

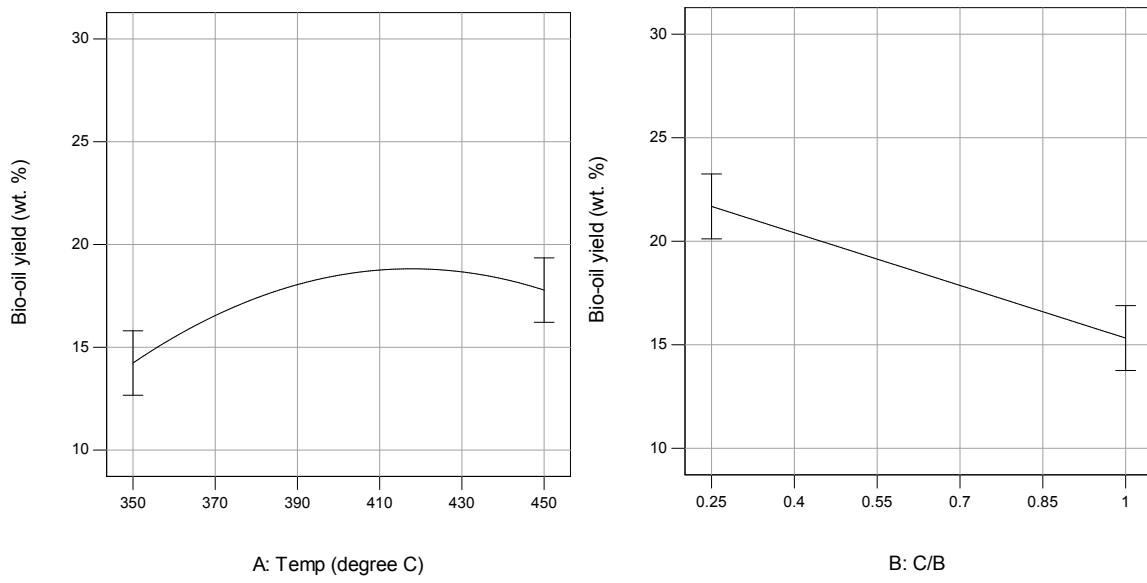

Figure S2. Plot of main effects on bio-oil yield from in-situ catalytic pyrolysis

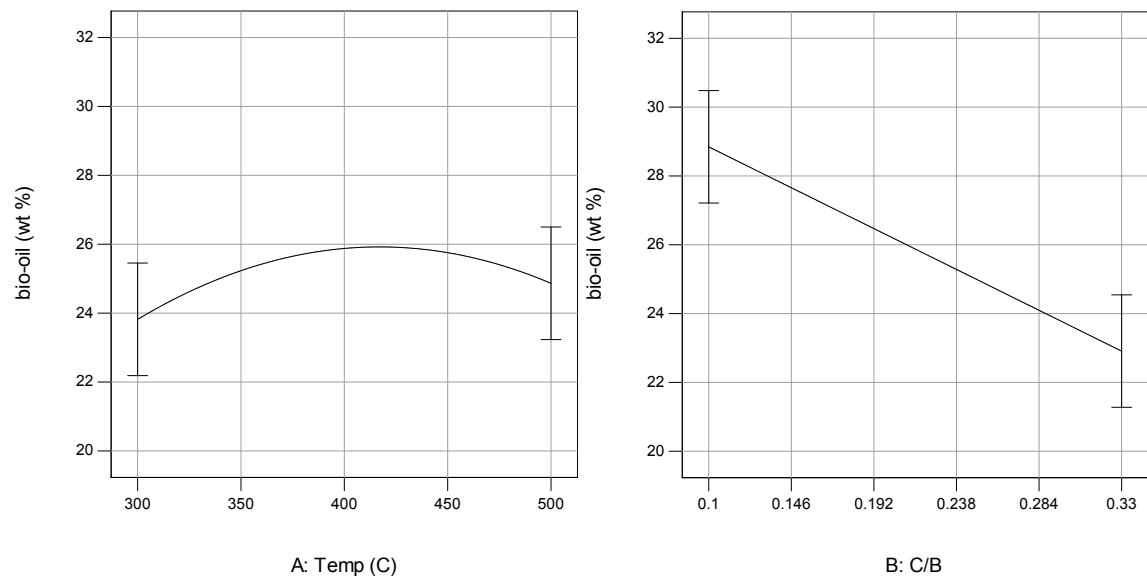

Figure S3. Plot of main effects on bio-oil yield from ex-situ catalytic pyrolysis

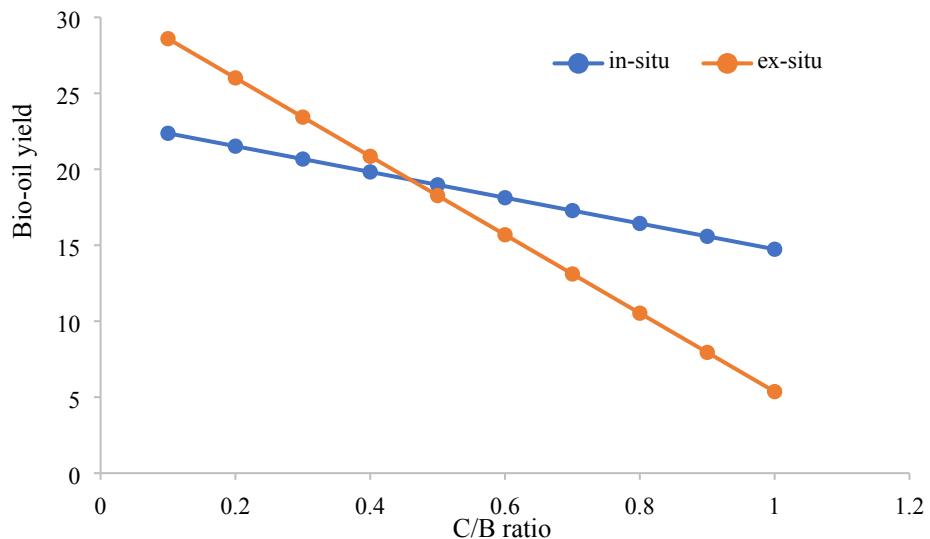

Figure S4. Comparison of bio-oil yield from in-situ and ex-situ catalytic pyrolysis (operated temperature: 450 °C)

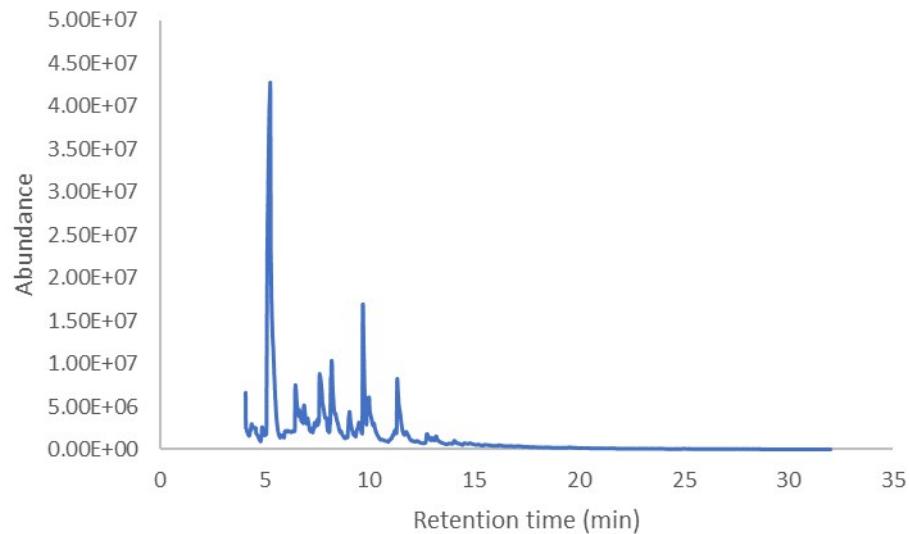

Table S3. Yields of major compounds in bio-oil from in-situ catalytic pyrolysis.

| Run Order | Temp | C/B | Phenol concentration (mg/ml bio-oil) | Furfural concentration (mg/ml bio-oil) | Guaiacol concentration (mg/ml bio-oil) |
|-----------|--------|-------|--------------------------------------|--|--|
| 1 | 400 | 0.625 | 9.72 | 9.52 | 0 |
| 2 | 400 | 0.625 | 5.26 | 15.16 | 0.9 |
| 3 | 470.71 | 0.625 | 4.54 | 16.54 | 2.46 |
| 4 | 350 | 0.25 | 4.78 | 20.9 | 2.86 |
| 5 | 400 | 1.155 | 7.16 | 2.38 | 0 |
| 6 | 329.28 | 0.625 | 5.12 | 7.42 | 0.6 |
| 7 | 450 | 0.25 | 4.14 | 20.2 | 3.5 |
| 8 | 350 | 1 | 9.9 | 6.76 | 0 |
| 9 | 400 | 0.625 | 5.76 | 18.02 | 2.14 |
| 10 | 400 | 0.625 | 4.82 | 11.98 | 1.64 |
| 11 | 400 | 0.625 | 4.24 | 12.6 | 1.44 |
| 12 | 450 | 1 | 6.84 | 3.52 | 0 |
| 13 | 400 | 0.094 | 4.32 | 14.4 | 2.48 |

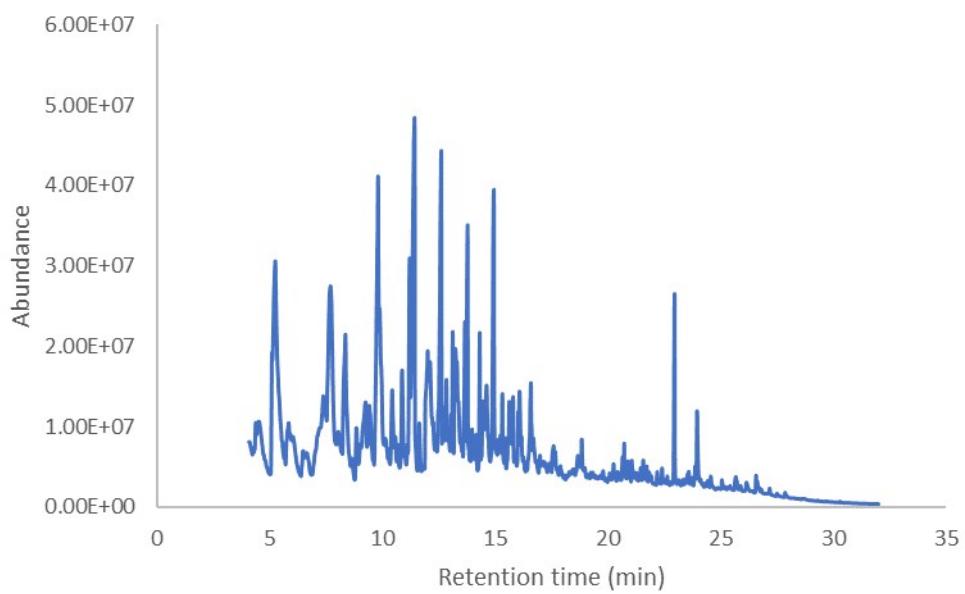

Table S4. Yields of major compounds in bio-oil from ex-situ catalytic pyrolysis.

| Run | Temp | C/B | Phenol concentration (mg/ml bio-oil) | Furfural concentration (mg/ml bio-oil) | Guaiacol concentration (mg/ml bio-oil) |
|-----|-------|-------|--------------------------------------|--|--|
| 1 | 300 | 0.1 | 6.82 | 32.98 | 8.78 |
| 2 | 300 | 0.33 | 19.76 | 28.28 | 2.76 |
| 3 | 258.5 | 0.215 | 7.9 | 39.66 | 11.42 |

| | | | | | |
|----|-------|-------|-------|-------|-------|
| 4 | 400 | 0.215 | 6.36 | 18.15 | 2.78 |
| 5 | 400 | 0.215 | 4.14 | 21.62 | 3.72 |
| 6 | 400 | 0.215 | 6.3 | 30.18 | 7.66 |
| 7 | 541.4 | 0.215 | 17.74 | 27.7 | 3.58 |
| 8 | 400 | 0.215 | 7.76 | 25.58 | 7.82 |
| 9 | 400 | 0.377 | 4.2 | 12.98 | 1.1 |
| 10 | 500 | 0.33 | 12.66 | 14.42 | 2.06 |
| 11 | 500 | 0.1 | 10.26 | 38.38 | 9.08 |
| 12 | 400 | 0.215 | 6.98 | 25.64 | 7.32 |
| 13 | 400 | 0.052 | 5.72 | 33.46 | 14.12 |
