

Supporting Information of

Co-Crystallization and polymorphic behaviours of 5-Fluorouracil

Dennis Enkelmann, Jens Handelsmann, Carsten Schauerte, Klaus Merz

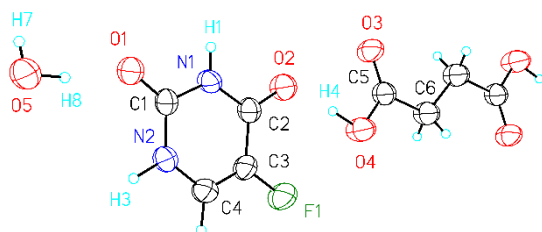

1. PXRD of polymorphic screening 5-Fluorouracil and nicotinamid (ration 1:1) in methanol (technical grade)

For comparison: Form II (red), Form I (blue), nicotinamide (purple)

2. (a) Molecular structure of 5-Fluorouracil / 0.5 succinic acid / H₂O **1** and
(b) 5-Fluorouracil / 0.5 adipic acid / H₂O **2** in solid state

(a)

(b)
