

**ESI for**

**Direct dehydrogenation of isobutane to isobutene over Zn-doped  
 $\text{ZrO}_2$  metal oxide heterogeneous catalysts**

Yang Liu, Chengjie Xia, Qi Wang, Lei Zhang, Ao Huang, Ming Ke\* and Zhaozheng Song

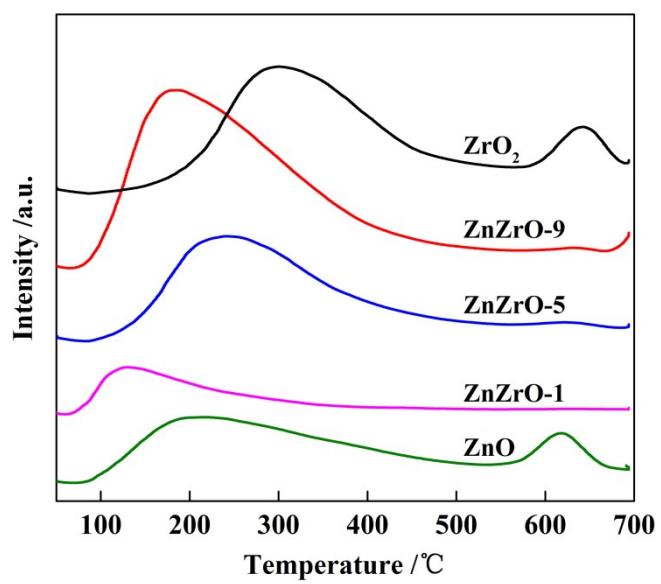

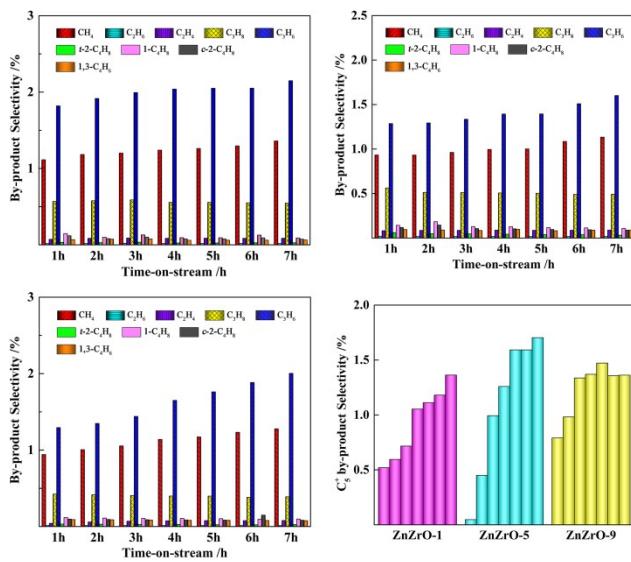

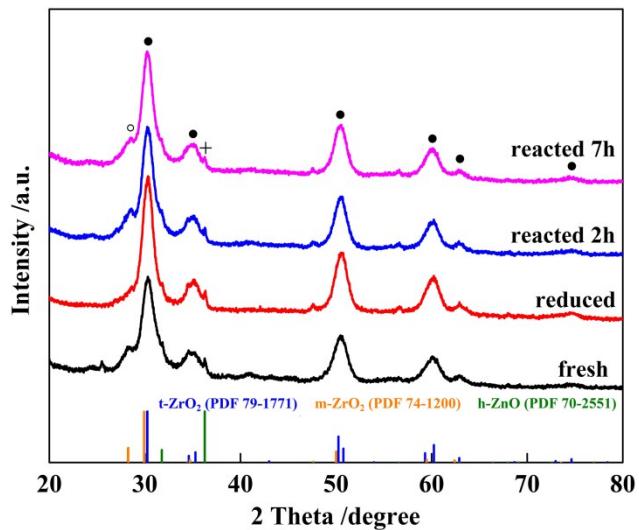

Fig. S1 CO<sub>2</sub>-TPD curves of ZnO, ZnZrO-x, and ZrO<sub>2</sub>.

**Table S1** Surface basicity of investigated catalysts.

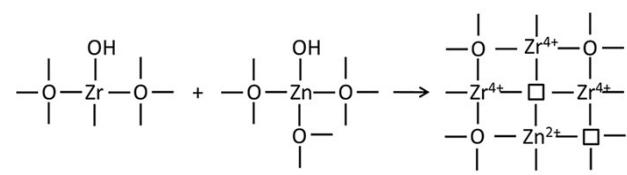

| Catalyst         | Temperature of maximum /°C | Quantity of basic sites /mmol g <sup>-1</sup> | Total basic sites /mmol g <sup>-1</sup> |
|------------------|----------------------------|---|---|
| ZrO <sub>2</sub> | 298                        | 0.1873  | 0.2070                                  |
|                  | 642                        | 0.0184  |   |
| ZnZrO-9          | 183                        | 0.2763  | 0.2788                                  |
|                  | 634                        | 0.0008  |   |
| ZnZrO-5          | 239                        | 0.1615  | 0.1648                                  |
|                  | 631                        | 0.0023  |   |
| ZnZrO-1          | 128                        | 0.0715  | 0.0721                                  |
|                  | 624                        | 0.0002  |   |
| ZnO              | 200                        | 0.1139  | 0.1287                                  |
|                  | 619                        | 0.0142  |   |

**Fig. S2:** By-product selectivity of (a) ZnZrO-1, (b) ZnZrO-5, and (c) ZnZrO-9, (d)  $C_c$  by-products selectivity of three ZnZrO-x mixed oxides.

**Fig. S3** XRD patterns of (a) ZnO, (b) ZnZrO-1, (c) ZnZrO-5, (d) ZnZrO-9 and (e) ZrO<sub>2</sub>. (+: h-ZnO, •: t-ZrO<sub>2</sub>, o: m-ZrO<sub>2</sub>).

**Scheme S1** The formation of  $\text{Cu}^{2+}$  sites and oxygen vacancies.

**Table S2** Surface and bulk Zr/Zn atom ratio of ZnZrO-5 from XPS and EDX.

| Sample | Scan spot | Atomic /% |       |       | Zr/Zn mole ratio |
|--------|-----------|-----------|-------|-------|------------------|
|        |           | Zr        | Zn    | O     |                  |
| XPS    | 1         | 8.14      | 18.55 | 73.31 | 2.28             |
|        | 2         | 8.01      | 20.42 | 71.56 | 2.54             |
| EDX    | 1         | 4.39      | 22.13 | 73.48 | 5.04             |
|        | 2         | 5.41      | 26.46 | 68.14 | 4.90             |
