

Supplementary Figure S2.

Supplementary Figure S2. Representative images showing the effect of the different BW products on TNF- α -induced migration in myofibroblasts of colon CCD-18Co after 48 h of treatment. The cells were co-treated with 20 ng/mL TNF- α together with BW-enhanced breads (b BW and b_{500} BW), fermented and non-fermented BW groats (f BWg and BWg) and BW sprouts (BWS₁₀₀). Vertical black lines indicate manual trace from the top to the bottom of the wound.
