## 1.General information

All the reactions were carried out under air atmosphere and without any dry solvent. Carbohydrates, anilines, silanes and the catalyst $\mathrm{HReO}_{4}$ ( $75-80 \%$ aqueous solution) were obtained from commercial suppliers and were used without further purification. Flash chromatography was performed on MN Kieselgel 60M 230-400 mesh. ${ }^{1} \mathrm{H}$ NMR, ${ }^{13} \mathrm{C}$ NMR and ${ }^{31} \mathrm{P}$ NMR spectra were measured on a Bruker Avance $\mathrm{II}^{+} 400 \mathrm{MHz}$ and 300 MHz spectrometers. Chemical shifts are reported in parts per million (ppm) downfield from an internal standard. The furfural yields were determined by ${ }^{1} \mathrm{H}$ NMR spectroscopy using mesitylene as internal standard, the pulse sequence $\mathrm{zg} 30, \mathrm{D} 1=1.0 \mathrm{~s}$ and position of $\mathrm{O} 1=2470.97 \mathrm{~Hz}$.

## 2.General procedure for the conversion of xylose into furfural catalyzed by $\mathbf{H R e O}_{\mathbf{4}}$

To a Schlenk flask equipped with a J. Young tap containing a solution of xylose (1.0 mmol ) in 1,4-dioxane ( 10 mL ) was added $\mathrm{HReO}_{4}(5 \mathrm{~mol} \%)$. The reaction mixture was stirred in a closed Schlenk at $140{ }^{\circ} \mathrm{C}$ during 2 h . The yield of furfural was determined by spectroscopy ${ }^{1} \mathrm{H}$ NMR using mesitylene as internal standard.

## 3.General procedure for the one-pot synthesis of furfurylamines

To a Schlenk flask equipped with a J. Young tap containing a solution of carbohydrate ( 1.0 mmol of pentose) in 1,4-dioxane ( 10 mL ) was added $\mathrm{HReO}_{4}(5 \mathrm{~mol} \%)$. The reaction mixture was stirred in a closed Schlenk at $140^{\circ} \mathrm{C}$ during 2 h . Then, the reaction mixture was cooled at room temperature and aniline ( 1.0 mmol ) and dimethylphenylsilane ( 1.2 mmol ) was added. After 1 h at $140^{\circ} \mathrm{C}$, the reaction mixture was evaporated and the residue was purified by flash chromatography with appropriate mixtures of $n$-hexane:ethyl acetate, affording the furfurylamines.
