

Supplementary Information

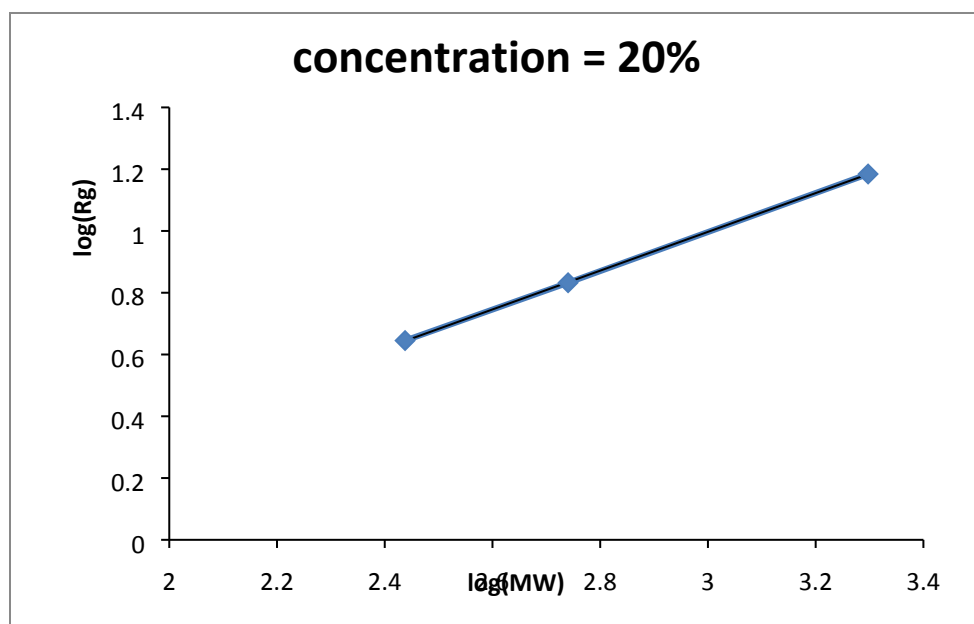

Figure S1. Plots of the log of the radius of gyration (R_g) (in nm) versus log of the molecular weight (MW) for PEG chains (6,10 28, 45) of presented on outer monolayer (OM) of a vesicle. The plots are for the following relative concentrations of the PEG chains: 2.2% (top), 10% (middle) and 20% (bottom).
