

Efficient biocoverison of Furfural to Furfuryl Alcohol by *Bacillus coagulans* NL01

Yu-Xiu Yan,^{a,b} Chong-Yang Bu,^c Qin He,^c Zhao-Juan Zheng,^a and Jia Ouyang^{*a,c}

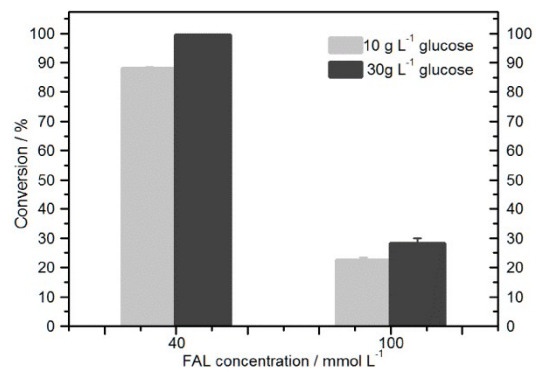

Figure.S1. Whole cell-catalyzed reduction of FAL in the presence of 10 g L⁻¹ and 30 g L⁻¹ glucose.

Conditions: 40,100 mM FAL, 9 mg (dry weight) / ml microbial cells, 25 ml phosphate buffer (200 mM pH 7.0), 150 rpm, 50 °C.
