CSD SEARCH

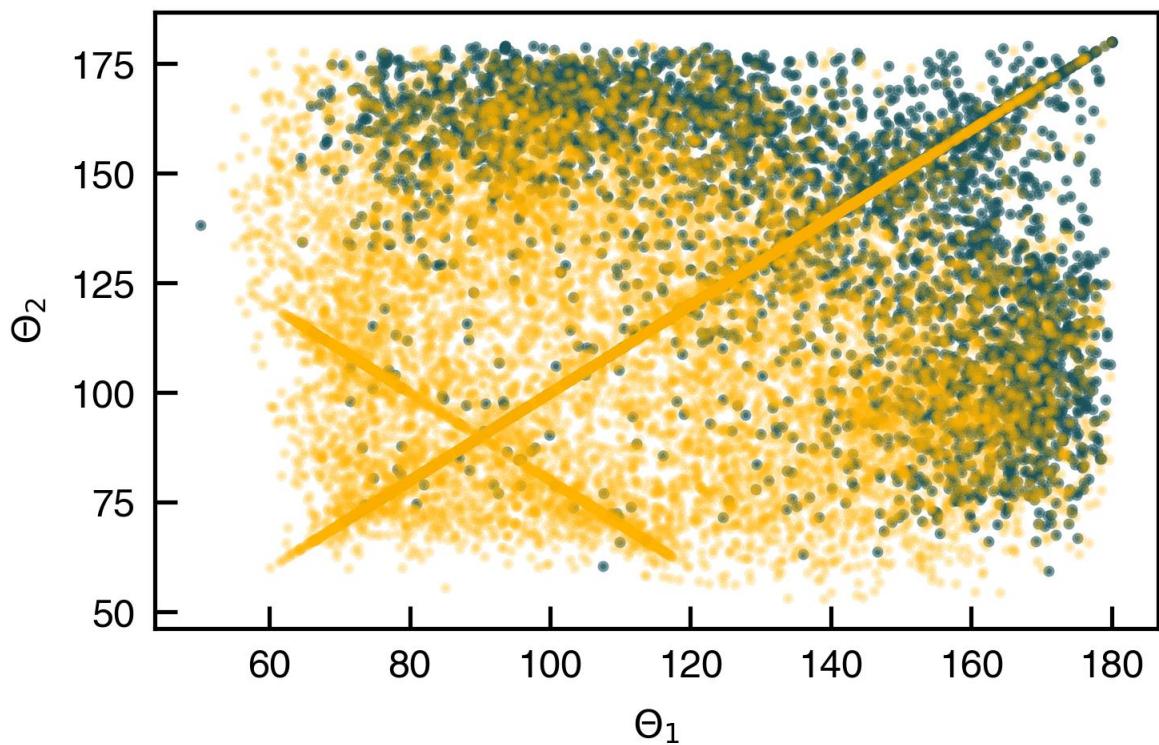

Figure 1: Scatter plot for searching at up to 10% more than the sum of the van der Waals radii of (C-Br \cdots Br-C) which covers the (Br \cdots Br < 4.07Å) range. Blue points stand for contacts with less than the sum of the van der Waals radii and golden points stand for contacts with up to 10% more than the sum of the van der Waals radii.

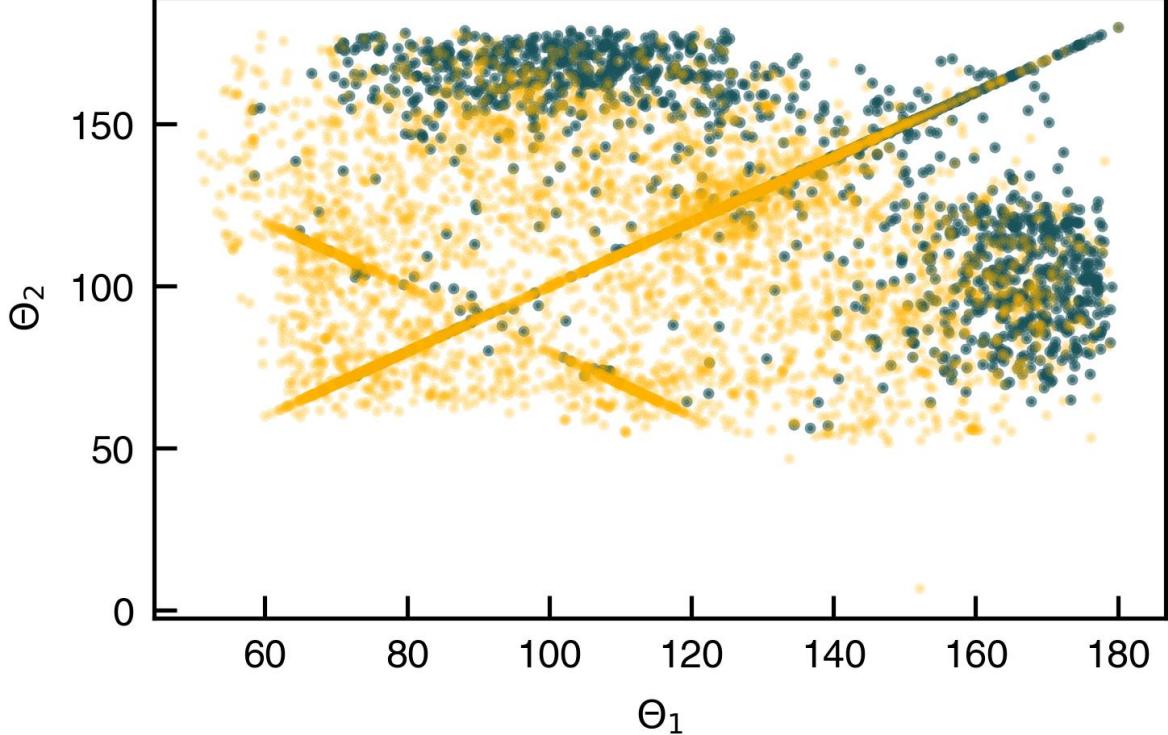

Figure 2: Scatter plot for searching at up to 10% more than the sum of the van der Waals radii of (C-I \cdots I-C) which covers the (I \cdots I < 4.36Å) range. Blue points stand for contacts with less than the sum of the van der Waals radii and golden points stand for contacts with up to 10% more than the sum of the van der Waals radii.

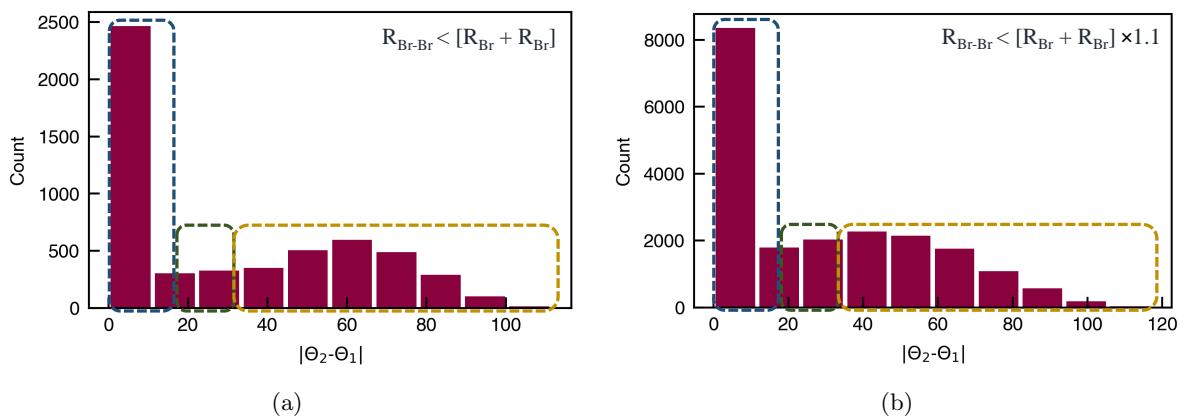

Figure 3: Bar chart of (C-Br \cdots Br-C) (a) searching at less than the sum of the van der Waals radii which covers the (Br \cdots Br < 3.70Å) range (b) Bar chart of (C-Br \cdots Br-C) for searching at up to 10% more than the sum of the van der Waals radii of (Br \cdots Br) which covers the (Br \cdots Br < 4.07Å) range. The domain with the golden dots line indicates type II interaction, the domain with the blue dots line indicates type I and the domain with the green dots line indicate quasi-type I interactions.

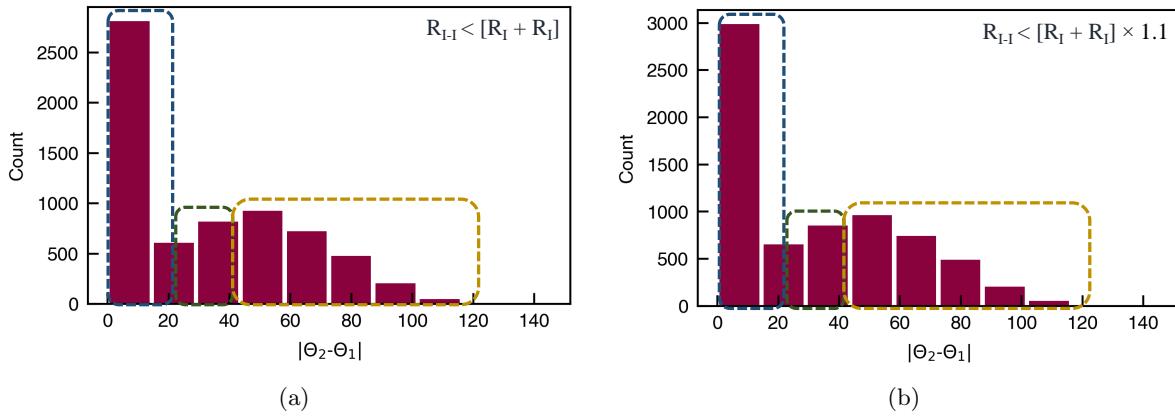

Figure 4: Bar chart of (C-I...I-C) (a) searching at less than the sum of the van der Waals radii which covers the ($I\cdots I < 3.96\text{\AA}$) range (b) Bar chart of (C-I...I-C) for searching at up to 10% more than the sum of the van der Waals radii of ($I\cdots I < 4.36\text{\AA}$) range. The domain with the golden dots line indicates type II interaction, the domain with the blue dots line indicates type I and the domain with the green dots line indicate quasi-type I interactions.
