List of Tables

Table S1. Relative Energy (RE, in eV) of Singlet, Triplet, Quintet, and Septet Spin of Endohedral clusters with respect to corresponding Septet Spin Exohedral Cluster using Different DFT methods with and without symmetry

Table S2. Relative Energy (RE, in eV) of Singlet, Triplet and Quintet Spin of Exohedral clusters with respect to corresponding Septet Spin Exohedral Cluster using Different DFT methods with and without symmetry

Table S3. Calculated Values of the Optimized Bond Lengths (R, in Å) of bare $\text{Al}_{12}\text{H}_{12}^{2-}$ and Exohedral ($\text{An}@\text{Al}_{12}\text{H}_{12}^{2-}$ and $\text{Ln}@\text{Al}_{12}\text{H}_{12}^{2-}$) Clusters in Septet Spin State using B3LYP/DEF Method

Table S4. Calculated Values of the Optimized bond lengths (R, in Å) of bare $\text{B}_{12}\text{H}_{12}^{2-}$ Cluster and Exohederal ($\text{An}@\text{B}_{12}\text{H}_{12}^{2-}$ and $\text{Ln}@\text{B}_{12}\text{H}_{12}^{2-}$) Clusters in Septet Spin State using B3LYP/DEF Method

Table S5. Comparison of Calculated Values of Optimized Bond Length ($R_{(\text{M}-\text{Al})}$, in Å), Binding Energy (BE, in eV), HOMO–LUMO Energy Gap (ΔE_{Gap} , in eV), NPA Charge on Doped ion (q_M , in e) and Total Spin Population (N_S) of Exohederal $\text{Pu}@\text{Al}_{12}\text{H}_{12}$ and $\text{Sm}@\text{Al}_{12}\text{H}_{12}$ Clusters with and without Symmetry in Septet Spin State using Different DFT Methods. Atomic f-Population (nf) of An/Ln is Provided in Parenthesis

Table S6. Comparison of Calculated Values of Optimized Bond Length ($R_{(\text{M}-\text{B})}$, in Å), Binding Energy (BE, in eV), HOMO–LUMO Energy Gap (ΔE_{Gap} , in eV), NPA Charge on Doped ion (q_M , in e) and Total Spin Population (N_S) of Exohederal $\text{Pu}@\text{B}_{12}\text{H}_{12}$ and $\text{Sm}@\text{B}_{12}\text{H}_{12}$ Clusters with and without Symmetry in Septet Spin State using Different DFT Methods. Atomic f-Population (nf) of An/Ln is Provided in Parenthesis

Table S7. Comparison of Calculated Values of the Optimized Bond Lengths ($R_{(\text{M}-\text{Al})}$, in Å), Binding Energy (BE, in eV), HOMO-LUMO Energy Gap (ΔE_{Gap} , eV) and Total Spin Population (N_S) of Endohederal $\text{Pu}@\text{Al}_{12}\text{H}_{12}$ and $\text{Sm}@\text{Al}_{12}\text{H}_{12}$ Clusters with and without

Symmetry in Septet Spin State using Different DFT Methods. Atomic f-Population (nf) of An/Ln is Provided in Parenthesis

Table S8. Comparison of Binding Energy (BE, in eV), HOMO–LUMO Energy Gap (ΔE_{Gap} , in eV) and $\langle S^2 \rangle$ value of Exohedral $\text{An}@\text{Al}_{12}\text{H}_{12}^{2-}$ and $\text{Ln}@\text{Al}_{12}\text{H}_{12}^{2-}$ Clusters in Septet Spin State using B3LYP/DEF, PBE/DEF, M06-2X/DEF and TPSSH/DEF Methods

Table S9. Comparison of Binding Energy (BE, in eV), HOMO–LUMO Energy Gap (ΔE_{Gap} , in eV) and $\langle S^2 \rangle$ value of Exohedral $\text{An}@\text{B}_{12}\text{H}_{12}^{2-}$ and $\text{Ln}@\text{B}_{12}\text{H}_{12}^{2-}$ Clusters in Septet Spin State using B3LYP/DEF, PBE/DEF, M06-2X/DEF and TPSSH/DEF Methods

Table S10. Analysis of the Orbitals Compositions of Septet Spin Endohedral $\text{Pu}@\text{Al}_{12}\text{H}_{12}$ Cluster in C_{3v} Symmetry Using PBE/TZ2P Method

Table S11. Analysis of the Orbitals Compositions of Septet Spin Endohedral $\text{Sm}@\text{Al}_{12}\text{H}_{12}$ Cluster in C_{3v} Symmetry Using PBE/TZ2P Method

List of Figures

Figure S1. Optimized exohedral and endohedral cluster using different initial geometry without any symmetry constrain at B3LYP/DEF level of theory

Figure S2. Molecular orbital pictures of $\text{Al}_{12}\text{H}_{12}^{2-}$ cluster in I_h symmetry using B3LYP/DEF Method

Figure S3. Molecular orbital pictures of endohedral $\text{Pu}@\text{Al}_{12}\text{H}_{12}$ cluster in C_{3v} symmetry using B3LYP/DEF Method. (Blue text represents MOs with metal-cage overlap, red text represent pure cage MOs, green text represent MOs with negligible mixing of cage with the metal)

Figure S4. Energy barrier plots of exohedral and endohedral a) $\text{Pu}@\text{Al}_{12}\text{H}_{12}$ and b) $\text{Sm}@\text{Al}_{12}\text{H}_{12}$ clusters, respectively, obtained using B3LYP/DEF method.

Figure S5. Density of state (DOS) plots of (a) Pu@Al₁₂H₁₂ and (b) Sm@Al₁₂H₁₂, septet spin exohedral clusters at B3LYP/DEF, PBE/DEF, M06-2X/DEF and TPSSH/DEF level of theory

Figure S6. Density of state (DOS) of spin up (alpha) and spin down (beta) plots of (a) An@Al₁₂H₁₂²⁻ (An = Pu²⁺, Am³⁺) and (b) Ln@Al₁₂H₁₂²⁻ (Ln = Sm²⁺, Eu³⁺) septet spin exohedral clusters at B3LYP/DEF level of theory. (Vertical Arrow represents highest energy SOMO)

Figure S7. Molecular orbital pictures of valence singly occupied molecular orbitals (SOMOs) of septet spin exohedral PuB₁₂H₁₂ at B3LYP/DEF level of theory.

Table S1. Relative Energy (RE, in eV) of Singlet, Triplet, Quintet, and Septet Spin of Endohedral clusters with respect to corresponding Septet Spin Exohedral Cluster using Different DFT methods with and without symmetry
