<sup>a</sup> The data of each compound were the average of three parallel samples and normalized by peak area normalization method. A, L and W: the sites of sample collections (A: A-San-Long; L: Lao-Mu-Shao; W: Wenshan). And the three samples collected in Wenshan county were numbered as W-1, W-2 and W-3, respectively. M: mock group, used as blank control. I and L: the growing status of 3-year-old *P. notoginseng* (I: III, H: Healthy). -: without detection.

**Table S2.** The sources of identified compounds in the collected soils of *P. notoginseng*
