

Supplementary Material

Elemental analysis: formula for dried complex **1**: $C_{128}H_{106}Ca_2Mn_{13}O_{54}$
Calculated (Found): C, 46.55 (46.43); H, 3.24 (3.15); N, 0.00 (0.00).

The fit (solid lines) gives $S = 5/2$, $g = 1.857(53)$, and $D = -1.628(250)$. The isofield lines are at 0.5 (■), 1 (●), 3 (▲), 4 (○) and 5 (▼) tesla fields.
