

Supporting Information 1SPM.

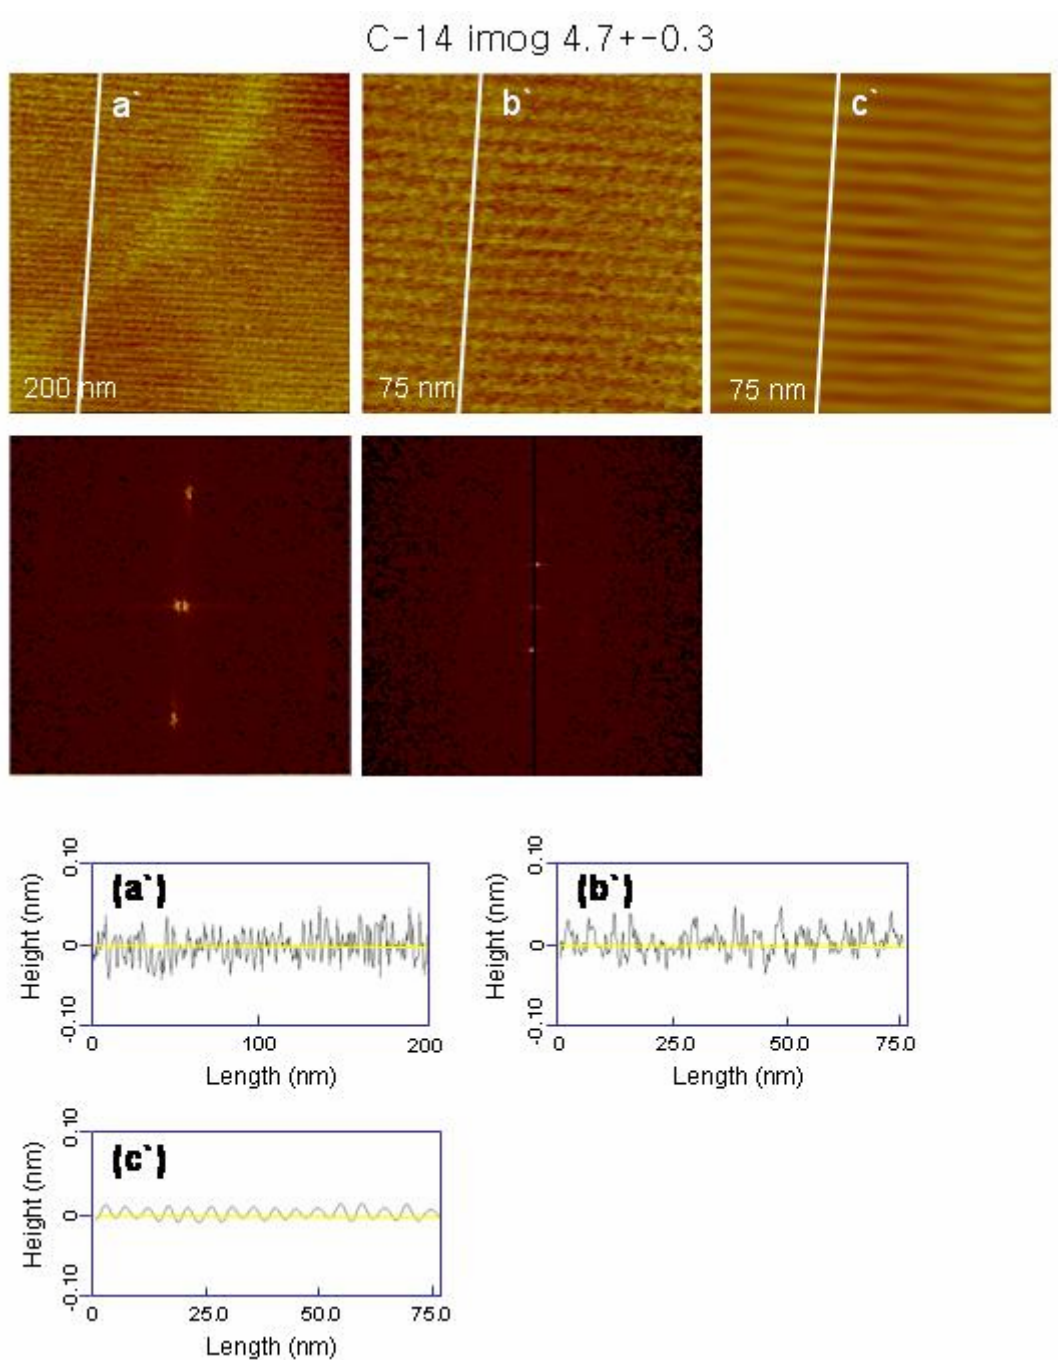

Figure S.1. AFM images of the TDPA at the graphite substrate, a' is the image in 200nm, b' is the image of 75nm, c' is the smoothen image of b'. Fourier transferred images and height profiles are also indicated in the Figure.

Supporting Information 2.

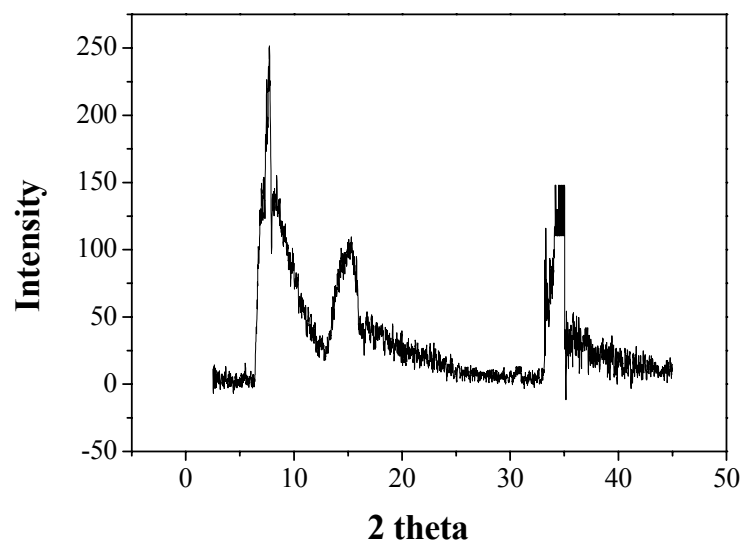

Figure S.2. X-ray diffraction data for aligned ODPA imogolite 30 times transferred at 0.5mN/m.
