Date: Wednesday, May 01, 2013 5:14:30 PM

Dear Jian Wang

Thank you for depositing your crystal structure(s) at the Cambridge Crystallographic Data Centre. The data have been assigned the following deposition numbers.

CCDC 936787

Summary of Data CCDC 936787

Compound Name:
Formula: C₁₆ H₁₃ N₃
Unit Cell Parameters: a 11.8598(10) b 5.6497(4) c 18.4376(15) Pna21
Authors:

If we have any queries relating to the data then we will contact you later.

Data submitted as a Private Communication will be processed and added to the Cambridge Structural Database (CSD). Please note, if the data have not appeared in a journal publication 3 years after the date of deposition, and the CCDC cannot contact you to discuss the matter, then the CCDC will automatically include the data in the CSD as a Private Communication.

Kind regards,

Data Acquisition Team

You can deposit your CIFs and structure factors via the internet, using our online service.
